

Volume 2 Stormwater Runoff Management Manual

Table of Contents

Acknowledgments	iii
Chapter 1: Introduction to Stormwater Runoff Processes	1-1
Chapter 2: General Planning Concepts for Stormwater Runoff Management and Overview of Low-Impact Site Design and Smart Growth Concepts	2-1
Chapter 3: Stormwater Pollution Prevention Plan Preparation	3-1
Chapter 4: Best Management Practices Design	4-1
Planning	
Conservation Easements	4-3
Development Districts	4-7
Infrastructure Planning	4-12
Open Space Design	4-14
Protection of Natural Features	4-18
Redevelopment	4-24
Street Design and Patterns	4-27
Urban Forestry	4-32
Site Design	
Alternative Turnarounds	4-36
Eliminating Curbs and Gutters	4-39
Green Parking	4-43
Green Roofs	4-47
Narrower Residential Streets	4-55
Riparian/Forested Buffer	4-58
Infiltration	
Grassed Swales	4-63
Infiltration Basin	4-72
Infiltration Trench	4-78
Permeable Interlocking Concrete Pavement	4-83
Pervious Asphalt Pavement	4-87
Pervious Concrete	4-91
Filtration	
Bioretention (Rain Gardens)	4-96
Catch Basin Inserts	4-112
Sand and Organic Filters	4-115
Vegetated Filter Strip	4-123

Retention/Detention

Constructed Stormwater Wetland	4-127
Dry Detention Ponds	4-144
In-line Storage	4-150
Wet Pond	4-152

Additional Criteria

Additional Recommended Design Criteria, Specifications, Methodologies.....	4-164
--	-------

Appendices

(Available in *Appendices: Developing Plans & Designing Best Management Practices*)

A: Erosion and Stormwater Runoff Calculations	A-1
B: State and Federal Regulations, Permits and Applications	B-1
C: MS One-Call and 811 Color Coding	C-1
D: Erosion and Sediment Control and Stormwater Pollution Prevention Plan Examples	D-1
E: Model Ordinances for Stormwater Management	E-1
F: Erosion and Sediment Control and Stormwater Pollution Prevention Inspection Forms	F-1
G: Mississippi Department of Transportation Vegetation Schedule	G-1
H: Glossary	H-1
I: References	I-1
J: Local Information	J-1
