

STATE OF MISSISSIPPI SOLID WASTE MANAGEMENT PERMIT

TO OPERATE A SOLID WASTE MANAGEMENT FACILITY IN
ACCORDANCE WITH THE REGULATIONS GOVERNING
SOLID WASTE MANAGEMENT

THIS CERTIFIES THAT
Rolloff Recycling Center, LLC

has been granted permission to operate a solid waste management facility

located at

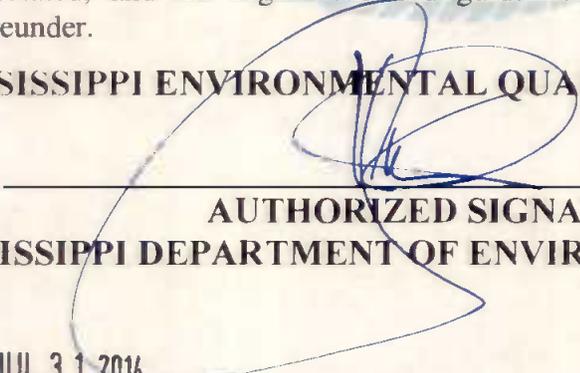

Section 15, Township 01N, Range 14W
Lumberton, Mississippi
Lamar County

under the name of

Rolloff Recycling Center, LLC, Processing Facility

This permit is issued in accordance with the provisions of the Mississippi Code Annotated, and the regulations and guidelines adopted and promulgated thereunder.

MISSISSIPPI ENVIRONMENTAL QUALITY PERMIT BOARD

AUTHORIZED SIGNATURE

MISSISSIPPI DEPARTMENT OF ENVIRONMENTAL QUALITY

Issued: JUL 31 2016
Expires: JUN 30 2024

Permit No. SW0370050571

CONDITIONS

A. EFFECT OF PERMIT

The permittee shall operate the solid waste management facility in accordance with the Mississippi Nonhazardous Waste Management Regulations (state regulations), applicable federal regulations, the application, plan of operation as approved and the conditions of this permit.

B. PERMIT ACTIONS

This permit may be modified, revoked and reissued, or terminated for noncompliance with the terms and conditions of the permit. The filing of a request for a permit modification, revocation and reissuance, or termination or the notification of planned changes or anticipated noncompliance on the part of the permittee does not stay the applicability or enforceability of any permit condition.

C. SEVERABILITY

The provisions of the permit are severable, and if any provision of this permit or the application of any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances, and the remainder of this permit shall not be affected thereby.

D. DUTIES AND REQUIREMENTS

1. **Duty to Comply.** The permittee shall comply with all conditions of this permit. Any permit noncompliance constitutes a violation of the solid waste law and regulations promulgated thereunder and is grounds for enforcement action, permit termination, revocation and reissuance, modification, or for denial of a permit renewal application.
2. **Land Deed of Trust.** The permittee shall maintain access rights to the property where the facility is located for the duration of this permit and shall provide the Department with a copy of any lease renewal or other document regarding continued access rights.
3. **Duty to Reapply.** If the permittee wishes to continue an activity allowed by this permit after the expiration date of this permit, the permittee must submit a complete application for a new permit at least 180 days before this permit expires.
4. **Duty to Mitigate.** The permittee shall take all reasonable steps to minimize, prevent, or correct any adverse impact on human health or the environment resulting from noncompliance with this permit.

5. **Proper Operation and Maintenance.** The permittee shall at all times properly operate and maintain all equipment and systems which are installed or used by the permittee to achieve compliance with the conditions of this permit and application as submitted and approved by the Mississippi Department of Environmental Quality (Department).

6. **Duty to Provide Information.** The permittee shall furnish to the Department, within a reasonable time, any relevant information which the Department may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit.

7. **Inspection and Entry.** The permittee shall allow an authorized representative of the Department upon the presentation of credentials and other documents as may be required by law to:
 - a. Enter on the permittee's premises where a regulated activity is located or conducted, or where records must be kept under the conditions of this permit;
 - b. Have access to and copy at reasonable times any records that must be kept under the conditions of this permit;
 - c. Inspect at reasonable times any facilities, equipment, practices, or operations regulated or required under this permit;
 - d. Sample or monitor at reasonable times for the purposes of assuring permit compliance.

8. **Financial Responsibility Requirements.** Should the Department determine the operations conditions at the site warrant the establishment of financial responsibility, the permittee would be required to estimate the costs of disposal of the maximum amount of wastes expected on-site before closure of the facility. At that time, the permittee shall be required to provide the Department with proof of financial responsibility issued in the amount of the closure cost estimate each year on a schedule approved by the Department.

9. **Signature Requirements.** An application for the issuance, re-issuance, modification or transfer of this permit and all reports required by this permit or other information requested by the Permit Board shall be signed as follows:
 - a. For a corporation: a president, vice-president, secretary or treasurer of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation;
 - b. For a partnership or sole proprietorship: a general partner or the proprietor, respectively;

- c. For a municipality, county, state, federal or other public agency: either a principal executive officer or ranking elected official;
- d. The signature of a Duly Authorized Representative (DAR) shall be a valid signature under this permit, in lieu of the signatures described within this condition, provided the following conditions are met:
 - (1) The DAR is an employee of the permittee;
 - (2) The DAR is identified to the Department by the ranking officer of the corporation, partnership, proprietorship, municipality, county, state, federal or other public agency;
 - (3) The DAR is responsible for the overall management of the solid waste management facility.

10. **Transfer of Permits.** This permit is not transferable to any person except after notice to and approval of the Mississippi Environmental Quality Permit Board. The Permit Board may require modification or revocation and reissuance of the permit to change the name of the permittee and incorporate such other requirements as may be necessary.

E. SITE SPECIFIC REQUIREMENTS

1. Authorized Waste

The permittee is authorized to accept and process non-hazardous wastes collected from construction, demolition, and similar project sites only serviced by Rolloff Recycling Center, LLC. This does not include wastes from any residential or other commercial entities not employed or contracted by Rolloff Recycling Center, LLC. Authorized wastes include the following:

- a. All waste materials listed in the “Revised Plan of Operations” dated March 11, 2014
- b. Other wastes approved for Class I and II Rubbish Site disposal according to 11 Miss. Admin. Code Pt. 4, R. 1.6.B-C
- c. Other wastes approved by the Department

2. Unauthorized Waste

Any waste load containing unauthorized wastes as defined below shall be refused unless all unauthorized waste is removed immediately upon unloading and placed in a designated container for transport to an authorized solid waste management facility. Unauthorized wastes include the following:

- a. Any acceptable waste which has been contaminated by a pollutant, such as a food or chemical, unless it can be demonstrated to the satisfaction of the Department that processing such waste has no adverse effect on human health or the environment
 - b. Household garbage and other food and drink waste
 - c. Liquids, sludges, and contaminated soils
 - d. Toxic or hazardous wastes as defined in Subtitle C of the Resource Conservation and Recovery Act
 - e. Regulated asbestos and asbestos-containing material originating from a facility, as defined by the National Emission Standards for Hazardous Air Pollutants (40 CFR 61, Subpart M)
 - f. Medical waste
 - g. Refrigerators, air conditioners, and other appliances that may contain refrigerants or hazardous substances unless an appropriately certified handler of these materials is present on site to do so
 - h. Whole or processed waste tires
 - i. Other wastes prohibited by MDEQ
3. The facility shall be operated in accordance with the plan of operation and 11 Miss. Admin. Code Pt. 4, Ch. 1. A copy of the plan of operation must be kept onsite at all times.
 4. Adequate security and monitoring shall be maintained to prevent unauthorized access to the facility. Entrances to the facility shall be locked outside of work hours, and no wastes shall be accepted unless an attendant is on duty.
 5. A sign shall be placed at the entrance(s) of the processing facility indicating the name of the facility, the hours and days of operation, and the permit number.
 6. All unloading, sorting, processing, and storage of accepted materials in an outdoor setting will be done at a minimum of 100 feet from the property line except for the property line along the northwest entrance of the property, which will have a minimum setback from operations of 200 feet. Indoor activities must remain 50 feet from the property line.
 7. Each accepted load of material shall be sorted and separated for either storage or bailing within 72 hours.

8. Recyclable materials shall not be stored onsite for longer than 30 days unless the permittee demonstrates to the Department's satisfaction that either market conditions or lack of adequate material accumulation prevent transport offsite. At no time shall recyclable material be stored onsite for longer than six (6) months from the time of receipt.
9. Unauthorized wastes shall be removed and transported to a permitted management or disposal facility at a minimum of every two weeks or as often as necessary to preclude the creation of objectionable offsite odors, fly-breeding, or harborage of other vectors.
10. To the greatest extent possible, both processed and unprocessed materials shall be kept in storage containers or underneath the roofed structure on the property. Materials not placed in containers or under the roofed structure shall be elevated on pallets or similar platforms that reduce contact between stormwater drainage and these materials.
11. The permittee shall use tarps or alternative methods during rain events to prevent direct rainfall contact with materials stored outside of the roofed structure.
12. No more than 100 waste tires may be temporarily stored on-site without additional authorization from the Department. Tires shall be removed on an adequate frequency and stored under the roofed structure in a manner that prevents nuisance conditions and fire hazards.
13. The facility shall be operated in such a manner as to prevent the migration of objectionable off-site odors, dust particles or other such nuisances.
14. All processing equipment shall be regularly serviced and maintained to assure adequate handling of waste and to prevent potential down time at the facility.
15. Any and all contaminated liquid at the processing facility resulting from operations or cleanup shall be collected and properly disposed of in accordance with state water regulations. Any spills from fuel, oil, or other chemical containers shall be immediately cleaned up upon discovery in accordance with the site's stormwater pollution prevention plan.
16. No contaminant shall be allowed to enter any waters of the State as a result of rainfall runoff or other discharge from the facility, which would cause a violation of any water quality standard established by the Department.
17. All windblown litter on the property shall be collected and properly disposed of by the end of each operating day.
18. Open burning of wastes shall be strictly prohibited. Should an accidental fire occur, immediate action shall be taken to extinguish the fire and the Department shall be notified by the close of the Department's next business day. Within 5 days after the

event, the permittee shall notify the Department of the event in writing describing the cause, corrective action, and steps to be implemented to reduce recurrence of a fire.

19. All processed wood (wood chips) shall be stored in roll-off containers or trailers in such a manner as to prevent overflow onto the ground.
20. No pile of unprocessed wood materials shall exceed the following dimensions: 8 feet in height, 50 feet in width, and 100 feet in length.
21. All piled or containerized materials on the site shall be spaced apart a minimum of 5 feet to prevent the spread of potential fires. Adequate fire suppressant materials shall be kept onsite in case of the occurrence of small fires.
22. Any anticipated noncompliance with the aforementioned conditions or with any other applicable regulation or law shall be immediately reported to the Department. Furthermore, any planned significant modification to the plan of operation should be submitted in writing to the Department for approval prior to implementation of the change.
23. At least 60 days prior to the closure of this facility, a written closure plan describing the steps necessary to remove and properly dispose of all wastes and to close and deactivate the facility shall be submitted to the Department.

F. MONITORING, RECORDKEEPING, AND REPORTING REQUIREMENTS

1. The permittee shall keep an accurate written daily record of deliveries of solid wastes to the facility including the following:
 - a. The source of the waste including the street address and type of project;
 - b. The quantity of solid waste in tons received at the facility, which in the absence of scales can be obtained using volume conversion factors as developed or approved by the Department;
 - c. Other information associated with the management of solid waste at the facility as directed by the Department.
2. The permittee shall keep an accurate written daily record of recyclable materials sold or otherwise removed from the facility including the following:
 - a. Type and quantity of materials in tons
 - b. End user receiving the materials
3. The permittee shall keep records of any unauthorized waste loads transported offsite for disposal including the quantity in tons and name of the facility accepting the wastes.

4. All records shall be kept onsite or otherwise available for view during Department inspections for no less than three (3) years.

5. The permittee shall submit an annual report to the Department no later than the 28th of February following each calendar year. The annual report shall include the following information related to the operations of the preceding calendar year:
 - a. The quantity of waste received in tons for processing at the facility during the calendar year
 - b. The quantity of recycled material in tons sold during the calendar year
 - c. The quantity of unrecyclable material in tons transported offsite for disposal during the calendar year
 - d. A list of all the end users to where recyclable materials were sold during the calendar year
 - e. Any other information requested by the Department
