Mr. James Matheney  
Mining and Reclamation Division  
Office of Geology  
Mississippi Department of Environmental Quality  
P. O. Box 2279  
Jackson, MS 39225

Re: **Mining Notice of Exempt Operation**  
James A. Hodges Construction Company, Inc., Holloway Mine  
1328 County Road 885  
Salttillo, MS 38866 (Lee County)

Dear Mr. Matheney:

James A. Hodges Construction Company Inc., has retained the services of Environmental Compliance & Safety, Inc. (ECS) to prepare the Notice of Exempt Operation for Holloway Mine. Also included with this form is an aerial map marked with the site location, the Mining Notice of Intent (MNOI) and associated Storm Water Pollution Prevention Plan (SWPPP). Signed hard copies of these documents are being submitted as well.

If you have any questions or concerns regarding the enclosed documents, please feel free to contact me at (662) 840-5945 or Chad Rankin at (662) 842-8538.

Sincerely,

Jennifer Deignan  
Project Manager

Cc: Carrie Barefoot (MDEQ)  
Chad Rankin (James A. Hodges Construction, Inc.)

Attachment I: Notice of Exempt Operation  
Attachment II: Mining Notice of Intent  
Attachment III: Stormwater Pollution Prevention Plan

## **ATTACHMENT I**

NOTICE OF EXEMPT OPERATION

MISSISSIPPI DEPARTMENT OF ENVIRONMENTAL QUALITY  
OFFICE OF GEOLOGY  
Mining and Reclamation Division  
P. O. Box 2279  
Jackson, Mississippi 39225-2279  
(601) 961-5515

**NOTICE OF EXEMPT OPERATION**

This form shall be filed with the Office of Geology, Mining and Reclamation Division **only** for operations affecting **4** acres or less **and greater** than **1320** feet from another mine. **NOTE:** Local, county, federal or other state agencies may also require permits before mining can be done on your site. This is *your* responsibility.

Name of applicant/operator: James A. Hodges Construction Company, Inc.  
Mailing address: 1281 County Road 811  
Saltillo, Mississippi 38866  
Telephone number: 662-842-8583

Do you have any **other** exempt mining operations on file? ☒ yes ☐ no  
Do you plan to file for a **permit** and expand this site later? ☐ yes ☒ no

**LOCATION**

SE 1/4 of SW 1/4 of Section 10, Township 9S Range 6E County Lee

**Include a map or aerial photo marked with site location with this form.**

Name of land owner: James A. Hodges  
Mailing address: 1281 County Road 811  
Saltillo, Mississippi 38866  
Telephone number: 662-842-8538

Date operation to begin 12/18/2023 Date operation to end (estimated) 12/31/2033  
Material to be mined Borrow Dirt/Sand Number of acres to be mined 3.9 (A)\*  
**Total acres** to be affected by operation (mine, roads, storage, etc.) 3.9 (B)\*  
Is operation **closer** than 1,320 feet (1/4 mile) to another mine? ☒ no ☐ yes\*

**\*If items A or B exceed 4 acres or you answered YES above, you need to apply for a MINING PERMIT.**

MINING NOTICE OF INTENT

AI: 86005

Coverage #:  
MSR323049

MISSISSIPPI DEPARTMENT OF  
ENVIRONMENTAL QUALITY

Rec'd via email:  
03/12/2024

**MINING NOTICE OF INTENT (MNOI)  
FOR COVERAGE UNDER  
MINING STORM WATER, DEWATERING AND NO DISCHARGE  
GENERAL PERMIT MSR32 3049  
(Number to be assigned by State)**

**File at least 30 days prior to the commencement of mining; 15 days if a Storm Water Pollution Prevention Plan (SWPPP) is already on file and mine dewatering is not proposed. Lateral expansion of an existing mine that has general permit coverage requires the submittal of the Major Modification Form, not a new MNOI. However, modification of the existing SWPPP to include the expansion is required. Discharge of storm water or impounded water associated with mining or the operation of a wastewater recirculation system with no discharge without written notification of coverage from MDEQ is a violation of State Law.**

**If the company seeking coverage is a corporation, a limited liability company, a partnership, or a business trust, attach proof of its registration with the Mississippi Secretary of State and/or its Certificate of Good Standing. This registration or Certificate of Good Standing must be dated within twelve (12) months of the date of the submittal of this coverage form. Coverage will be issued in the company name as it is registered with the Mississippi Secretary of State.**

**Please indicate the activities to be covered by this MNOI (check all that apply).**

- ☒ Storm Water Discharges Associated with Mining ☐ Mine Dewatering  
☐ Wastewater Recirculation System with No Discharge

**The appropriate section of the MNOI must be completed if the applicant proposes to discharge storm water, discharge impounded mine water (dewatering) and/or operate a wastewater recirculation system with no discharge.**

**A site-specific Storm Water Pollution Prevention Plan (SWPPP) developed in accordance with ACT5 of the General Permit and a United States Geological Survey (USGS) quadrangle map or photocopy, indicating the site location and outfalls must be included with the MNOI submittal. The name of the quadrangle map must be shown on all copies. Quadrangle maps can be obtained from the MDEQ, Office of Geology at 601-961-5523. Additional submittals may include the following (check all that apply).**

- ☐ Section 404 Documentation ☒ Notice of Exempt Operations Form  
☐ Dam/Reservoir Safety Permit or Written Authorization

**ALL INFORMATION MUST BE COMPLETED (indicate "N/A" where not applicable)**

### RECEIVING STREAM INFORMATION

NEAREST NAMED RECEIVING STREAM: Unnamed Tributary of West Tulip Creek

IS RECEIVING STREAM ON MISSISSIPPI'S 303(D) LIST OF IMPAIRED WATER ☐ YES ☒ NO

BODIES? (The 303(d) list of impaired waters and TMDL stream segments may be found of MDEQ's website:

[http://www.deq.state.ms.us/MDEQ.nsf/page/TWB\\_Total\\_Maximum\\_Daily\\_Load\\_Section](http://www.deq.state.ms.us/MDEQ.nsf/page/TWB_Total_Maximum_Daily_Load_Section))

HAS A TMDL BEEN ESTABLISHED FOR THE RECEIVING STREAM SEGMENT? ☐ YES ☒ NO

### COMPLETE IF STORM WATER DISCHARGE IS PROPOSED

ATTACH A STORM WATER POLLUTION PREVENTION PLAN (SEE PERMIT FOR REQUIREMENTS)

IDENTIFY THE ASSOCIATION OR GENERIC SWPPP ON FILE AT MDEQ: See Attached.

### COMPLETE IF WASTEWATER RECIRCULATION SYSTEM WITH NO DISCHARGE IS PROPOSED

DISTANCE BETWEEN RECIRCULATION POND(S) AND PROPERTY LINE: (FT)  
(MUST BE AT LEAST 150 FEET)

NUMBER OF RECIRCULATION POND(S):

STORAGE CAPACITY OF EACH RECIRCULATION POND(S): (FT<sup>3</sup>)

### COMPLETE IF MINE DEWATERING IS PROPOSED

ESTIMATED DEWATERING VOLUME: (GAL/DAY)

NAME AND ADDRESS OF THE RECIPIENT OF THE DISCHARGE MONITORING REPORTS (DMRs), IF  
DIFFERENT FROM SIGNATORY:

**DOCUMENTATION OF COMPLIANCE WITH OTHER REGULATIONS/REQUIREMENTS**  
Coverage under this general permit will not be granted until all other required MDEQ permits and approvals are addressed.

WILL THE CONSTRUCTION OR OPERATION OF THIS MINE INVOLVE THE RE-ROUTING, FILLING OR CROSSING OF A WATER CONVEYANCE OF ANY KIND? ☐ YES ☒ NO

If yes, contact the U.S. Army Corps of Engineers' Regulatory Branch for permitting requirements. If the mine requires a Corps of Engineers Section 404 permit, provide appropriate documentation with this MNOI that:

- The mine has been approved by individual permit, or
- The work will be covered by a nationwide permit and NO NOTIFICATION to the Corps is required, or
- The work will be covered by a nationwide or general permit and NOTIFICATION to the Corps is required.

LIST ANY NPDES PERMIT NO(s). N/A GEOLOGY APPLICATION/PERMIT NO. N/A

LIST OTHER GEOLOGY PERMIT NUMBERS THAT APPLY TO COVERAGE AREA N/A

IS THE MINE LESS THAN 4 ACRES AND GREATER THAN 1320 FEET FROM ANOTHER MINE?

☒ YES A "Notice of Exempt Operations" Form must be included with the MNOI or proof of prior submission, if previously submitted to the Office of Geology.

☐ NO A "Notice of Intent to Mine Class I or Class II Materials" Form must be filed before coverage will be granted under the Mining General Permit. For information on Office of Geology requirements, call 601-961-5515.

LIST ANY LOCAL STORM WATER ORDINANCES WITH WHICH THE OPERATIONS MUST COMPLY AND SUBMIT ANY ASSOCIATED APPROVAL DOCUMENTATION. None.

IF IMPOUNDMENTS WILL BE CONSTRUCTED ABOVE NATURAL SURFACE ELEVATIONS, INDICATE WHICH, IF ANY, OF THE FOLLOWING APPLY.

- ☐ The impoundment will be constructed with a peripheral dam or levee 8 feet or greater in height, measured from the lowest elevation of its toe.
- ☐ The impoundment will have a maximum storage volume greater than 25 acre-feet.
- ☐ The impoundment will impound a watercourse with a continuous flow.
- ☐ The impoundment has the potential to threaten downstream lives or man-made structures.

If any of the impoundments meet any of the above criteria, the applicant will be required to obtain written authorization from MDEQ, Dam Safety Division before coverage will be granted under the Mining General Permit.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

## 2.0 STORM WATER POLLUTION PREVENTION PLAN OVERVIEW

---

### 2.1 Introduction

Federal Regulations codified in 40 CFR 122, 123, and 124 require facilities with storm water discharges associated with certain industrial activities to apply for permit coverage in accordance with the National Pollutant Discharge Elimination System (NPDES). James A Hodges Construction Company, Holloway Mine (Holloway Mine) is located at 1328 County Road 885 Saltillo, Mississippi 38866. Facility operations are classified under Standard Classification Code (SIC) Code 1442 (NAICS 212322, Industrial Sand Mining) by mining construction material, which is identified for coverage in the above-cited federal regulations.

The facility has prepared a Storm Water Pollution Prevention Plan (SWPPP) for exposed operations at the facility. The SWPPP was developed and will be implemented in accordance with the requirements of the Mississippi Department of Environmental Quality (MDEQ) Mining Storm Water, Dewatering, and No Discharge General Permit (hereafter referred to as General Permit) under the NPDES Wastewater Program. The SWPPP identifies potential sources of pollution that may affect the quality of storm water discharges associated with industrial activity, evaluates the risk of storm water discharges from these sources, and presents the management practices that will be used at the facility for minimization of pollutants in storm water discharges.

All reports and certifications required by the General Permit will be signed by a responsible corporate officer (RO) or duly authorized representative (DAR) who has responsibility for the overall facility operations and environmental matters. The SWPPP will be retained on-site at all times and made available upon request to an authorized representative of MDEQ and United States Environmental Protection Agency (USEPA). The SWPPP will be amended whenever there is a change in construction, operation, or maintenance that may affect the discharge of storm water from the site.

### 2.2 General Information

Is the receiving stream identified on the Section 303(d) List of Impaired Water Bodies?	No	Has a TMDL been completed for the receiving stream?	No
Discharge to Municipal Separate Storm Sewer System (MS4)?	No	If yes, name MS4:	N/A

## 2.3 SWPPP Objectives

The EPA published regulations in November 1990 under the NPDES program with the objective of controlling water pollution associated with storm water discharges. The goal of the storm water program was to improve water quality by reducing the amount of pollutants contained in storm water runoff from industrial sites. Mining facilities subject to the requirements of a NPDES storm water discharge permit must prepare and implement a SWPPP. The objectives of the SWPPP are to:

- ☐ Identify potential sources of pollution and associated risk, which may affect the quality of storm water discharges;
- ☐ Describe best management practices (BMPs) and control measures intended to minimize pollutants in the facility's runoff; and
- ☐ Provide practical guidance for implementing the SWPPP and complying with the terms and conditions of the General Permit.

## 2.4 SWPPP Elements

In order to meet the requirements of the General Permit, the subsequent sections of the SWPPP contain the following elements:

- ☐ **Section 3.0: Facility Information** - Describes site characteristics, process description, site security, site drainage, allowable non-storm water discharges, and storm water outfalls.
- ☐ **Section 4.0: Description of Potential Storm Water Pollutant Sources** - Existing industrial activities and significant materials exposed to storm water are identified and described, as well as, management practices and structural and nonstructural controls, and a list of significant spills or leaks.
- ☐ **Section 5.0: Storm Water Management Measures and Erosion and Sediment Controls** - Identifies management measures and controls, inspections, training designed to address conditions and operations present at the facility to reduce pollutants in storm water runoff, recordkeeping and internal reporting procedures, sediment and erosion controls measures, and storm water discharge limitations.
- ☐ **Section 6.0: Monitoring, Recordkeeping, and Reporting** - Procedures are outlined for conducting the routine site inspections, maintaining records of inspections, monitoring of discharges, implementing updates, and reporting to MDEQ.
- ☐ **Figures:** Includes a Site Location Map, Aerial Site Map, and Facility Diagram with site boundaries, buildings, process and storage areas, storm water outfall locations, and flow directions.

- ❑ **Appendices:** Includes the Routine Visual Inspection Form, a Personnel Training Record Form, Annual Storm Water Site Inspection Report Form, and the General Permit.

---

## 3.0 FACILITY INFORMATION

---

### 3.1 Site Characteristics

The Holloway Mine will be located on less than 4 acres of naturally gullied land southwest of County Road 885 and east of West Tulip Creek. A surface mining permit is not required since this operation affects 3.9 acres and is located greater than 1,320 feet from another mine. A Notice of Exempt Operation has been filed with the Office of Geology. Corners of the mines are marked with permanent vertical posts that are painted to denote the mine boundaries. The boundaries Holloway Mine are shown on **Figure 1**.

Soils in these general areas consist primarily of sandy loam. This type of soil typically produces a medium to high amount of runoff. The topography of the property varies, but generally consists of gullied land. The adjacent properties are used for recreational and undeveloped. The site location map, Figure 1, is a topographic map showing the area in which the sites are located. This map shows the property boundaries of the mine and extends at least one-half mile beyond the property boundary. An aerial site map is provided as **Figure 2 - Aerial Site Map**. **Figure 3** shows the extents of the mine, including the boundaries, storm water outfall locations, and storm water flow directions.

### 3.2 Process Description

The mine will be an open pit where approximately the top twenty (20) feet of soil is removed and stored onsite until needed. Equipment kept onsite will include an excavator and bulldozer for earth moving and a diesel tank. No chemicals are stored at the mine locations, and equipment maintenance will not be conducted at these locations. A portable toilet will be located near active mining areas. Overall surface drainage flows south through Outfall SW001 and west through Outfalls SW002 and SW003. Site security will consist of a locked gate at the entrance.

### 3.3 Site Drainage

The Saltillo area has high rainfall potential, with a mean of approximately 58" per year (National Oceanic and Atmospheric Administration data, 1991-2020). Storm water falling on the central portion of the property will drain southeast and exit through SW001. Storm water falling on the southwestern corner of the property will drain west and discharge through SW002. Stormwater on the northwest portion of the property will drain west and exit through SW003. Storm water falling on the north and eastern portions of the property will exit through sheet flow through no designated outfalls on respective sides of the property. Discharges from storm water outfalls eventually reach West Tulip Creek. None of the storm water runoff from the mine properties flows into impaired waterbodies as determined by the Mississippi Department of Environmental Quality.

### 3.4 Allowable Non-Storm Water Discharges

The General Permit contains provisions for allowable non-storm water discharges. The mining activities by Holloway Mine do not generate non-storm water discharges. No equipment or activities are present at the mine locations that would generate such discharges. The table below lists non-storm water discharges allowed by the General Permit and those discharges that the facility may have routinely or on occasion.

ALLOWABLE NON-STORM WATER DISCHARGES		
Non-storm water discharges allowed by the General Permit	Expected	
Discharges or flows from fire-fighting activities	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
Fire hydrant flushings	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
Water line flushing	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
Water used to control dust	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
Discharges from potable water sources	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
Uncontaminated air conditioning or compressor condensate	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
Uncontaminated pumped ground water	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
Footings drains	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
Diverted stream flows	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
Landscape irrigation	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>
Water used to wash vehicles or external building cleaning where detergents are not used	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>
Flows from riparian habitats and wetlands	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>

### 3.5 Storm Water Outfalls

Storm Water runoff exits the site at three (3) outfall locations, which are shown on **Figure 3** and described as follows:

Outfall	Drainage Area	Drainage Type & Direction	Receiving Body
SW001	Central and southern areas of property	Sheet flow south-southeast to a drainage swale in the south side of the property.	West Tulip Creek
SW002	Southwestern area of the property	Sheet flow west to a drainage ditch on southwest side of property.	West Tulip Creek

Outfall	Drainage Area	Drainage Type & Direction	Receiving Body
SW003	Northwestern area of the property	Sheet flow west to a drainage ditch on the northwest side of the property.	West Tulip Creek

---

## 4.0 DESCRIPTION OF POTENTIAL STORM WATER POLLUTANT SOURCES

---

### 4.1 Narrative Description of Significant Materials

Below is an inventory of significant materials potentially exposed to storm water:

ID No.	Exposed Materials	Best Management Practices (BMPs) Implemented
1.	Earth moving equipment (excavator, bulldozer, dump trucks, and personal vehicles)	Routine visual observations of equipment to ensure no fuel, oil, antifreeze, etc. has leaked and regular preventive maintenance program.
2.	Portable Toilet	Routine visual observations to ensure there are no leaks of sanitary waste.
3.	Receiving ditch or creek	Routine visual observations to prevent erosion of banks.
4.	General housekeeping	Routine visual observations of materials stored or handled (e.g., fuel) that could cause release to storm water; leaks, spills, and distressed vegetation.
5.	Diesel Tank	Routine visual observations of equipment to ensure no fuel has leaked and regular preventative maintenance.

### 4.2 Management Practices and Structural and Nonstructural Controls

Existing management practices employed to minimize contact of significant materials to storm water are listed below:

- ☐ Regular inspections are conducted on earth moving equipment.
- ☐ Annual storm water training is provided.
- ☐ Routine facility housekeeping is performed to cleanup miscellaneous debris.

Existing structural and nonstructural storm water controls utilized to minimize effects on storm water runoff are listed below:

- ☐ Leaks and spills will be contained using containment structures and/or absorbent materials (i.e., native soil) and will be cleaned up as soon as practical.
- ☐ When a disturbed area not actively being mined will be left undisturbed for 30 days or more, the appropriate temporary or permanent vegetative practices will be implemented within seven (7) calendar days.
- ☐ Soil outside the boundary of the active mine area is left intact with native grasses to prevent potential erosion.
- ☐ Drainage ditches and culverts are maintained to provide adequate storm water flow without erosion or plugging.
- ☐ The site is excavated, graded, and contoured in a way to minimize erosion from storm water and direct storm water to the outfalls.

#### 4.3 List of Significant Spills or Leaks

Significant spills or leaks are defined by federal regulations as a release within a 24-hour period of a hazardous substance or oil in an amount equal to, or in excess of, a reportable quantity listed in 40 CFR Part 117 and 40 CFR Part 302.

<b>SITE SPILL HISTORY</b>	<b>YES</b>	<b>NO</b>
Have any materials have been spilled, leaked, or otherwise accidentally released in significant quantities to storm water drains or ditches in the past five years?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Other than incidental spills, there have been no significant spills or releases from the facility.		

#### 4.4 Storm Water Discharge Limitations

Non-numeric limitations of the permit require storm water discharges to be free from the following:

- ☐ Debris, oil scum, and other floating materials other than trace amounts;
- ☐ Eroded soils and other materials that will settle to form objectionable deposits in receiving waters;
- ☐ Suspended solids, turbidity and color at levels inconsistent with receiving streams; and
- ☐ Chemicals in concentrations that would cause a violation of the State Water Quality Criteria in receiving streams.

---

## **5.0 STORM WATER MANAGEMENT MEASURES AND EROSION AND SEDIMENT CONTROLS**

---

### **5.1 Implementation of SWPPP**

Before ground disturbing activities begin, any necessary erosion and sedimentation storm water controls will be planned and implemented. During the life of the project, the need for different or additional erosion and sedimentation controls may arise due to a failure of a control or a change in ground disturbing activities. The site operator is responsible for implementing all necessary erosion and sedimentation controls to minimize the impact on receiving waters. As required by the Mining General Permit, the permittee will:

- ☐ Implement the SWPPP and retain a copy of the SWPPP at the permitted site. Failure to implement the SWPPP is a violation of permit requirements. A copy of the SWPPP must be made available to the MDEQ inspectors for review at the time of an on-site inspection.
- ☐ Ensure that appropriate Best Management Practices (BMPs) are in place upon commencement of mining operations.
- ☐ Amend the SWPPP if notified at any time by the Executive Director of MDEQ that the SWPPP does not meet the minimum requirements. A written certification must also be submitted to the Executive Director stating that the requested changes have been made. Unless otherwise provided, the requested changes shall be made within 15 days.
- ☐ Amend the SWPPP whenever there is a change in design, construction, operation, or maintenance which may potentially affect the discharge of pollutants to waters of the State or if the SWPPP proves to be ineffective in controlling storm water pollutants. The amended SWPPP shall be submitted to MDEQ within 30 days of amendment.
- ☐ Submit to MDEQ the Major Modification Form (see Mining Forms Package) for subsequent phases, expansions and modifications of mining development that are proposed but were not included in the original SWPPP. An expansion causing the operation to exceed 4 acres will require a permit from the Office of Geology.
- ☐ Install needed erosion controls, even if they may be located in the way of subsequent activities. It shall not be an acceptable defense that controls were not installed because subsequent activities would require their replacement or cause their destruction.
- ☐ Install additional and/or alternative erosion and sediment controls when existing controls prove to be ineffective in preventing sediment from leaving the site.
- ☐ Minimize off-site vehicle tracking of sediments.
- ☐ Comply with applicable State and local waste disposal, sanitary sewer or septic system regulations.
- ☐ Maintain all erosion controls. Except for sediment basins, all accumulated sediment shall be removed from structural controls when sediment deposits reach one-third to one-half the height of the control. For sediment basins, accumulated sediment shall be removed when the capacity has been reduced by 50%. All removed sediment deposits shall be properly disposed. Non-functioning controls shall be repaired, replaced or supplemented with functional controls within 24 hours of discovery or as soon as field conditions allow.

- ❑ Implement steps necessary to meet a specific wasteload allocation established subsequent to coverage issuance.

## 5.2 Good Housekeeping

Good housekeeping practices are intended to maintain areas in a clean and orderly manner. General housekeeping and cleaning activities are performed daily. These practices generally involve limiting the exposure of potential pollution sources to storm water by removing or covering the source, and by conducting daily cleanup. The following are part of the good housekeeping program:

- ❑ **Equipment Maintenance:** No cleaning, washing, or degreasing by the utilization of water and chemicals of any type shall be performed in outside areas where the drainage could conceivably reach a storm water system. All equipment maintenance is conducted at the maintenance building behind the manufacturing plant. Limited cleaning and washing with only water (no chemicals) is allowed.
- ❑ **Outdoor Material Storage:** No materials that could contaminate storm water are stored outside without containment (e.g., fuel).
- ❑ **Drainage System Maintenance:** Drainage ditches, storm water controls, and outfalls will be routinely inspected for visible sheen or other signs of contamination.
- ❑ **Erosion Control:** The site will be routinely inspected for signs of erosion, and eroding areas will be stabilized by necessary means.
- ❑ **Sanitary and Solid Waste:** Portable toilet is provided near the entrance. This unit is serviced by a third party. Solid waste receptacles will be placed at convenient locations and regular collection of waste will occur. Waste containers are inspected for leaks and overfilling and emptied when necessary.

## 5.3 Preventive Maintenance

Preventive maintenance inspections are performed in conjunction with the storm water inspections and are conducted at least monthly. Records of inspections and maintenance are maintained onsite. The facility preventive maintenance program includes inspection, testing, and maintenance of equipment that could fail or leak, resulting in the discharge of pollutants to storm water. Examples include inspections of mobile equipment and inspections of the portable toilet. In addition, facility grounds are routinely inspected for solid waste disposal, erosion, and other signs of potential storm water contamination.

## 5.4 Spill Prevention and Response

Potential pollution sources are inspected on a regular basis. Based on current facility processes and the lack of chemicals stored at the mines, a significant spill or release of a hazardous substance is unlikely. However, if a release occurs, corrective actions will be taken immediately to contain and cleanup the release. Safety Data Sheets (SDS) will be used as the guide for spill response. Spills will be contained at the mine site using native soils. Contaminated soils, debris, or other material generated during clean-up activities will be promptly removed and disposed of in accordance with Federal, State, and Local

requirements. All affected employees will be informed of their responsibilities for responding to releases.

Staff with cleanup responsibilities are trained to respond to emergency events and provide continuous coverage while the plant is in operation. The following steps must be completed if a release occurs which discharges from the mine site into adjacent streams or drainage areas:

1. The facility will notify the National Response Center at **(800) 424-8802** as soon as facility personnel first become aware of the discharge. The facility will also notify MDEQ within 24 hours of discovery of the discharge.
2. A written submission, including a description of the event; the cause; the date and time; the duration of the event; whether or not the problem has been corrected and the steps taken or planned to reduce, eliminate and prevent recurrence, will be submitted to the MDEQ within five (5) working days of the time the facility first became aware of the circumstances (use Discharge Notification Form in above referenced Plans).
3. This SWPPP will be amended within 30 calendar days of knowledge of the release if existing BMPs are deemed ineffective in controlling the release of pollutants. The amendment will include a description of the incident, as well as, new BMPs to minimize the potential of the incident recurring, if possible.

If a significant release does occur, Chad Rankin, the Project Manager or his designee is responsible for ensuring that these requirements are satisfied.

## **5.5 Employee Training**

Effective management of storm water pollution will require all applicable site personnel to be familiar with conditions that may cause pollution. Furthermore, day-to-day use of BMPs by all employees is essential for the success of the SWPPP. Employees who have received storm water training will be responsible for implementation of the guidelines established in the General Permit and the SWPPP. Training will address the following objectives:

- ☐ Good housekeeping practices;
- ☐ Spill prevention and response;
- ☐ Material management practices;
- ☐ Overview of the SWPPP and established BMP installation and maintenance;
- ☐ Procedures for monitoring; and
- ☐ Reporting, recordkeeping, and record retention requirements.

Training is required to be conducted on an **annual** basis. Newly hired employees will be trained in the responsibilities of storm water management prior to performing such duties. Regular feedback regarding the implementation and maintenance of the SWPPP is encouraged from all site personnel. A training documentation form is included as **Appendix B**.

## 5.6 Sediment and Erosion Controls

The Mining General Permit requires that the SWPPP include site-specific controls for mining/construction activities, as well as procedures for implementing such controls. The controls will be designed, installed, and maintained to retain sediment on-site and to minimize the discharge of pollutants. If any of the below controls cannot be implemented on the site, the SWPPP must include written justification as to why site-specific constraints and/or costs make the control(s) infeasible. At a minimum, such controls must be designed, installed and maintained to:

- ❑ Control storm water volume and velocity within the site to minimize soil erosion;
- ❑ Control storm water discharges, including both peak flow rates and total storm water volume, to minimize erosion at outlets and to minimize downstream channel and stream bank erosion;
- ❑ Minimize the amount of soil exposed during mining activity;
- ❑ Minimize the disturbance of steep slopes;
- ❑ Minimize sediment discharges from the site. The design, installation and maintenance of erosion and sediment controls must address factors such as the amount, frequency, intensity and duration of precipitation, the nature of resulting storm water runoff, and soil characteristics, including the range of soil particle sizes expected to be present on the site;
- ❑ Provide and maintain natural buffers around surface waters, direct storm water to vegetated areas to increase sediment removal and maximize storm water infiltration, unless infeasible;
- ❑ Minimize soil compaction and, unless infeasible, preserve topsoil;
- ❑ Direct storm water to vegetated areas, brush barriers, silt fences, hay bales, etc. to aid in the filtration, infiltration, velocity reduction and diffusion of the discharge;
- ❑ Transport runoff down steep slopes through lined channels or piping; and
- ❑ Minimize off-site vehicle tracking of sediments.

Controls are utilized to minimize the potential release of pollutants into storm water that is discharged from the mine sites. The controls utilized by Hollway Mine are designed to be compliant with standards set forth in the most recent edition of Mississippi's "Erosion Control, Sediment Control and Stormwater Management on Construction Sites and Urban Areas. Good vegetative cover is maintained in non-disturbed areas surrounding the active mine areas to minimize erosion potential and runoff contamination from sediment erosion. Slopes within mining sites are maintained at a gradient sufficient to minimize the erosion potential of the exposed soils.

Mine entrances are graveled to meet construction entrance requirements in order to reduce the tracking of sediment onto County Road 805. Additionally, James A. Hodges Construction Company has constructed a private road from County Road 805 to the mine entrance. The mine is constructed in such a way that steep slopes are mostly avoided. Erosion is minimized by maintaining the mine site on a gradual slope.

## 5.7 Structural Practices

Structural practices will divert flows from exposed soils and otherwise limit runoff from exposed areas. Such practices may primarily include the utilization of vegetative barriers and earthen berms, and in severe cases the utilization of silt fencing. Site grading at minimum slopes will produce sheet flow with minimum runoff and erosion potential. Due to the permeable and granular characteristics of the soils at this site, there are no sedimentation basins as no significant runoff is expected to occur from the site.

- ❑ **Vegetative Barriers** are maintained around the perimeter of the site to increase sediment removal and maximize storm water infiltration, unless infeasible.
- ❑ **Earthen Berms** are utilized upgradient of stockpile areas to route stormwater runoff around and minimize potential for sediment to leave the site.
- ❑ **Gravel** is used to reduce erosion at entrances/exits, roads, and/or parking surfaces.
- ❑ **Silt Fences** are utilized to capture sediment down gradient from the mining or disturbed areas. Frequent monitoring of silt fences must be performed. Silt fences must be inspected after each rain event and repairs made as appropriate. Further, sediment behind the silt fences must be removed when the accumulation is more than one half the height of the control height.
- ❑ **Perimeter Controls** include natural, undisturbed areas that are maintained and supplemented with silt fence around the project perimeter.

## 5.8 Vegetative Practices

Good vegetative cover will be maintained in non-disturbed areas surrounding the active mine site to minimize erosion potential and runoff contamination from sediment erosion. Effort will be made to preserve existing vegetation where possible and re-vegetate disturbed areas as soon as practicable after clearing, grading, excavating or other land disturbing activities. Vegetative practices at this site may include, but are not limited to, temporary seeding, permanent seeding, buffer zones, and topsoil preservation.

- ❑ **Temporary Seeding:** When a disturbed area not actively being mined will be left undisturbed for 30 days or more, the appropriate temporary or permanent vegetative practices will be implemented within seven (7) calendar days.
- ❑ **Permanent Seeding:** When a disturbed area not actively being mined will be left undisturbed for 30 days or more, the appropriate temporary or permanent vegetative practices will be implemented within seven (7) calendar days
- ❑ **Buffer Zones:** Dense undisturbed perennial vegetation, either original or reestablished, will make up the buffer zones where feasible for the purpose of minimize the risk of any potential nutrients or pollutants from leaving the site. Storm water will flow through the buffer zones as sheet flow.
- ❑ **Topsoil:** Any topsoil removed from the site will be stockpiled on the site for use in reclamation activities.

---

## 6.0 MONITORING, RECORDKEEPING, AND REPORTING

---

### 6.1 Routine Monitoring and Inspections

Routine (monthly) inspections will be conducted to check for proper operation of the mines and adequate protection of the receiving streams from excessive sediment discharges. All areas contributing to storm water discharges associated with mining activity will be inspected. The following areas will be inspected:

- ☐ Earth moving equipment;
- ☐ Discharges from outfalls;
- ☐ Areas around portable toilet; and
- ☐ Perimeter of active mine areas for erosion that could release storm water runoff.

Routine visual site inspections will be performed as often as needed but no less than once monthly. If feasible, the inspections will be conducted during or after storm events. An inspection will always be conducted within 24 hours after commencement of a rainfall event equal to or greater than a 2-year, 24-hour storm event (approximately 4 inches).

A record of all routine visual site inspections will be maintained onsite with the SWPPP and will contain the following information:

- ☐ Date of inspection;
- ☐ Name and signature of inspector;
- ☐ Observations of exposed industrial activities and equipment;
- ☐ Observations of facility drainage, storm water controls, and outfalls;
- ☐ Description of concerns or problem conditions observed; and
- ☐ Description of corrective actions needed, personnel responsible for implementing corrective action, anticipated time frame for implementing corrective actions, and date corrective actions were implemented.

Inspection details will be recorded in a format similar to the **Routine Visual Inspection Form** provided in **Appendix A**. The results of all inspections and associated corrective actions will be documented on the **Annual Storm Water Site Inspection Report Form** provided in Appendix C and kept with the SWPPP.

Paperwork from these inspections, monitoring records, and records of spill responses will be retained onsite for at least three (3) years from the date that the document was generated. The SWPPP and records retained in accordance with the SWPPP and the General Permit will be made available, upon request, to USEPA and MDEQ representatives.

## **6.2 Annual Storm Water Site Inspection Report Form**

The Annual Storm Water Site Inspection Report Form will consist of the results of all monthly site inspections. The results of the inspections will be documented each month on this form, including date, time, inspector's name, deficiencies found, if any, and any corrective actions necessary. A copy of the **Annual Storm Water Site Inspection Report Form** is provided in **Appendix C**. This form will be retained on-site for a period of at least three (3) years from the date the document was generated.

## **6.3 SWPPP Update**

The SWPPP will be updated to include potential sources of storm water contamination identified during the inspections and not already included in the plan, as well as, any additional BMPs or control measures needed to control new or existing sources of storm water contamination, or a planned change in the size, design, operation, or maintenance of the facility. Any change to the size, design, operation, or maintenance of the facility shall not be made until MDEQ has approved a revised SWPPP and has transmitted this approval to the facility in writing. The SWPPP will also be updated if the facility is notified by the Executive Director of MDEQ that the SWPPP does not meet minimum requirements. The update will be submitted within thirty (30) days of the notification by MDEQ, along with a certification that the requested changes have been made.

## **6.4 Non-Compliance Reporting**

In the event of anticipated, or unanticipated, non-compliance with the General Permit the following procedures will be followed:

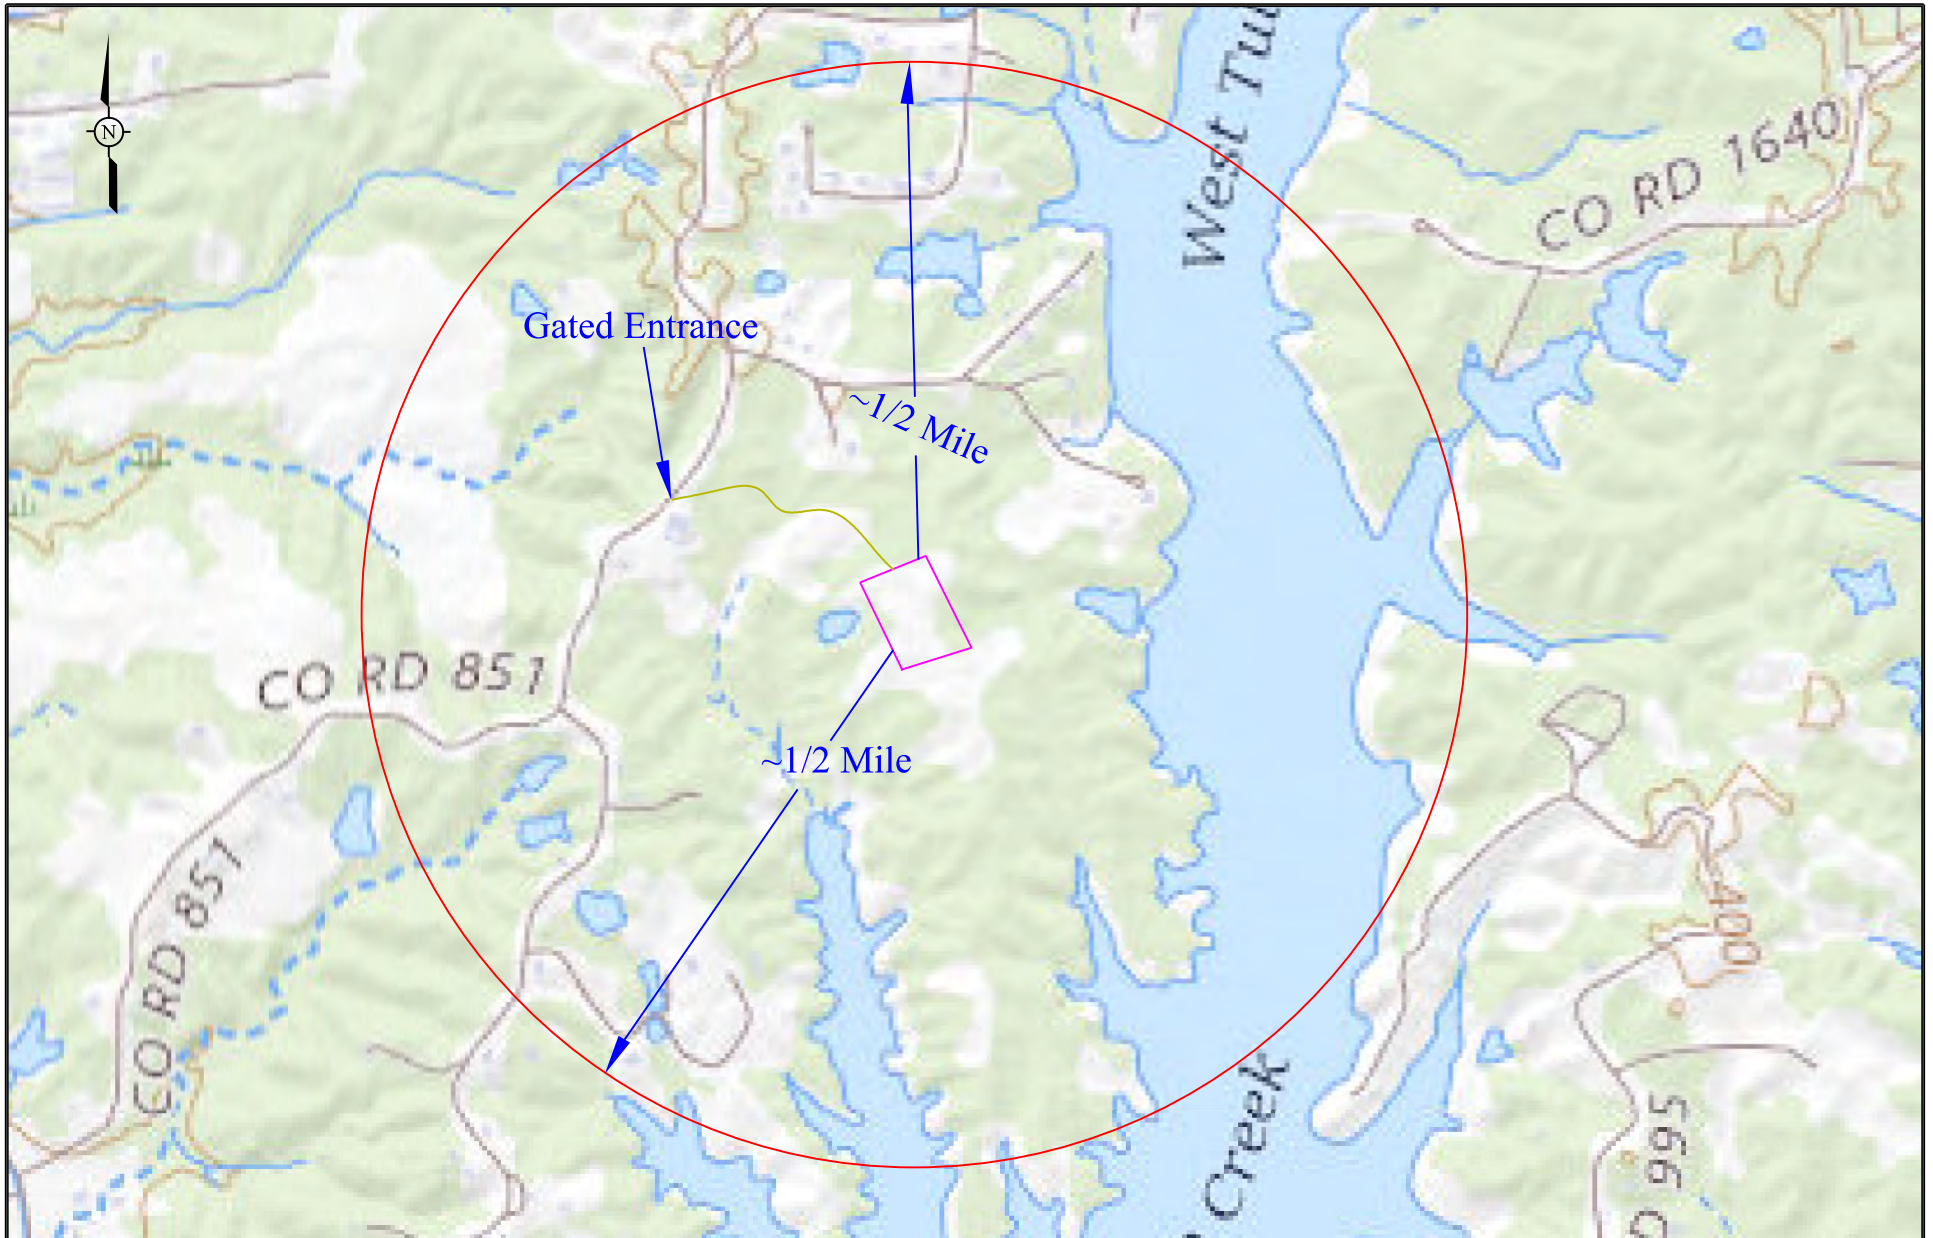

**Unanticipated Noncompliance** – The coverage recipient will notify MDEQ orally within twenty-four (24) hours from the time that he, or she, becomes aware of unanticipated noncompliance followed by a written notice to the MDEQ within five (5) working days. The written report must describe the cause; exact dates and times; steps taken or planned to reduce, eliminate, or prevent recurrence of the noncompliance and if noncompliance has not ceased, the anticipated time for correction.

**Anticipated Noncompliance** – The coverage recipient will give at least ten (10) days advance notice to MDEQ, if possible, before any planned noncompliance with the permit.

**ACT1 (Mining) Introduction:**

## Narrative Requirements:

Condition No.	Condition
------------------	-----------

## T-1 INTRODUCTION:

Subject to regulation and compliance with the conditions set forth, this Mining Storm Water, Dewatering, and No Discharge General Permit (Mining General permit) authorizes mining storm water and dewatering discharges and operation of wastewater recirculation systems with no discharge. This permit also authorizes storm water discharges from other mining activities, designated by the Executive Director, based on the potential for contribution to an excursion of a water quality standard or for significant contribution of pollutants to waters of the State.

National Pollutant Discharge Elimination System (NPDES) storm water discharge permits will be required for discharges associated with mining activities, listed in 40 CFR 122.26 (b) (14) (iii), that discharge storm water contaminated by contact with or that has come into contact with, any overburden, raw materials, intermediate products, finished products, byproducts or waste products located on the site. Storm water discharges that enter waters of the State or storm water conveyance systems leading to waters of the State are subject to regulation and compliance with the conditions set forth in this permit. This permit replaces the previous Mining Storm Water General Permit that expired on August 31, 2017.

Dewatering discharges include the pumping, draining or removing of water that is impounded or that collects in the mine. If such impounded water is commingled with process generated wastewater, the mixture shall be managed and permitted as process generated wastewater. Wastewater recirculation systems with no discharge include wash operations with closed loop recirculation systems with no discharge of wastewater and hydraulic dredge operations with closed loop recirculation systems with no discharge of dredge wastewater. [11 Miss. Admin. Code Pt. 6, Ch. 1.]

## T-2 SURFACE MINING AND RECLAMATION APPLICABILITY:

Application for coverage under this permit may also serve as notification that the proposed mining is an "Exempt Operation" as defined by Mississippi's Surface Mining and Reclamation Rules and Regulations. Non-exempt surface mining operations shall require an Office of Geology Mining Permit, issued in accordance with the Mississippi Surface Mining and Reclamation Rules and Regulations. Mining operations shall be subject to the prohibitions on mining in certain areas, known as Lands Unsuitable for Surface Mining, contained in Miss. Code Ann. Sections 53-7-49 and 53-7-51 and Chapter 4 of the Mississippi Surface Mining and Reclamation Rules and Regulations

In addition to the requirements of this permit, any person engaging in mining operations in the State of Mississippi shall be required to conform to and comply with all applicable provisions of the Mississippi Surface Mining and Reclamation Rules and Regulations under the Authority of Miss. Code Ann Section 53-7-11, et seq. The definitions and provisions contained in the Mississippi Surface Mining and Reclamation Rules and Regulations (February 2010) and the Wastewater Regulations for National Pollutant Discharge Elimination System (NPDES) Permits, Underground Injection Control (UIC) Permits, State Permits, Water Quality Based Effluent Limitations and Water Quality Certification shall be applied in interpreting any provision of this permit. [11 Miss. Admin. Code Pt. 6, Ch. 1. and 11 Miss. Admin. Code Pt. 8, Ch. 1.]

**ACT2 (Mining) Permit Applicability and Coverage:**

## Narrative Requirements:

Condition No.	Condition
T-1	<p>PERMIT AREA:</p> <p>The Mining General Permit covers all areas of the State of Mississippi. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-2	<p>ELIGIBILITY:</p> <p>(1) This permit may cover discharges composed of storm water, impounded water (mine dewatering) from active and inactive mining operations, and wastewater recirculation systems with no discharge. This permit may cover all new, existing, and abandoned mining facilities in the State of Mississippi, which include, but are not limited to, Standard Industrial Classifications (SIC) 1442-Construction Sand and Gravel, (SIC) 1453-Fire Clay-Manufacturing, (SIC) 1455-Kaolin and Ball Clay, or (SIC) 1459-Clay, Ceramic, and Refractory Minerals, Not Elsewhere Classified.</p> <p>(2) ACTs 1 through 9 and 13 through 16 of this permit apply to all covered discharges. The ACTs listed below are applicable to specific mining activities and must be followed in addition to the requirements of ACTs 1 through 9 and 13 through 16 of this permit.</p> <p>ACT10 - Mining Activities Considered "Exempt Operations"</p> <p>ACT11 - Wastewater Recirculation Systems with No Discharge</p> <p>ACT12 - Mine Dewatering</p> <p>(3) A facility is eligible for coverage under this permit for discharges of pollutants of concern to water bodies for which there is a Total Maximum Daily Load (TMDL) established or approved by EPA if measures and controls are incorporated that are consistent with the assumptions and requirements of such TMDL. To be eligible for coverage under this permit, the facility must incorporate in the SWPPP and/or effluent limitation any conditions applicable to any discharge(s) necessary for consistency with the assumptions and requirements of such TMDL. If, after coverage issuance, a specific waste load allocation is established that would apply to the facility's discharge, the facility must implement steps necessary to meet that allocation within three (3) months from the final TMDL approval date. MDEQ's approved TMDL list may be found at the link listed in paragraph (4) below. In addition, MDEQ's "Erosion Control, Sediment Control and Stormwater Management on Construction Sites and Urban Areas (Three Volumes)" identifies specific controls that may be used to address consistency with any applicable TMDLs. The manual can be found at: <a href="http://www.deq.state.ms.us/MDEQ.nsf/page/epd_epdgeneral">http://www.deq.state.ms.us/MDEQ.nsf/page/epd_epdgeneral</a>. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT2 (continued):**

## Narrative Requirements:

Condition No.	Condition
T-3	<p data-bbox="212 396 1908 548">(4) A project is eligible for coverage under this general permit for discharges of storm water to impaired water bodies on MDEQ's 303(d) list, provided best management practices (BMPs) are employed that prohibit further impairment of the designated and/or existing beneficial uses in the receiving water body. To be eligible for coverage under this general permit, the owner/operator must indicate on the MNOI that the project discharges to a 303(d) listed receiving water and incorporate appropriate BMPs in its SWPPP. MDEQ's 303(d) list of impaired water bodies may be found on MDEQ's website at: <a href="http://www.deq.state.ms.us/MDEQ.nsf/page/TWB_Total_Maximum_Daily_Load_Section">http://www.deq.state.ms.us/MDEQ.nsf/page/TWB_Total_Maximum_Daily_Load_Section</a>.</p> <p data-bbox="212 581 690 609">(5) Allowable Non-Storm Water Discharges:</p> <ul data-bbox="212 646 1411 1011" style="list-style-type: none"> <li>- Water line flushing</li> <li>- Landscape irrigation</li> <li>- Diverted stream flows</li> <li>- Uncontaminated pumped ground water</li> <li>- Discharges from potable water sources</li> <li>- Uncontaminated air conditioning or compressor condensate and coil wash water with no detergents or additives</li> <li>- Footing drains</li> <li>- Flows from riparian habitats and wetlands</li> <li>- Dust suppression water</li> <li>- Discharges or flows from fire fighting activities</li> <li>- Fire hydrant flushings</li> <li>- External building or vehicle wash downs which do not use detergents</li> </ul> <p data-bbox="212 1044 1908 1131">As noted in ACT5, T-5, the above non-storm water discharges should be eliminated or reduced to the extent feasible. The Permit Board staff will review the above discharges on a case by case basis and may require the coverage recipient to apply for and obtain either an individual or an alternative general NPDES permit as provided in ACT3, S-2. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT2 (continued):**

## Narrative Requirements:

Condition No.	Condition
T-4	<p>THIS PERMIT DOES NOT AUTHORIZE:</p> <p>(1) Discharges which result in violation of State Water Quality Standards.</p> <p>(2) Discharges which include mine process generated wastewater or wastewater associated with dredging and/or washing operations are not covered under this permit. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p> <p>(3) Activities that affect waters of the State, including wetlands, without obtaining the necessary U.S. Army Corps of Engineers (COE) approval. This may include a COE individual Section 404 permit or coverage under a COE nationwide or general permit. . Appropriate documentation must be submitted with the Mining Notice of Intent (MNOI).</p> <p>(4) Discharges or discharge-related activities that are likely to jeopardize the continued existence of any species that is listed as endangered or threatened under the Endangered Species Act (ESA) or result in the adverse modification or destruction of habitat that is designated as critical under the ESA. Coverage under this permit is available only if the regulated entity's storm water and dewatering discharges, allowable non-storm water discharges, and discharge-related activities are not likely to jeopardize the continued existence of any species that is listed as endangered or threatened ("listed") under the ESA or result in the adverse modification or destruction of habitat that is designated as critical under the ESA ("critical habitat"). Submission of a signed MNOI, or County Utility Authority approval, if applicable, will be deemed to constitute the regulated entity's certification of eligibility. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-5	<p>Mining operations that collect all the storm water that has come in contact with any overburden, raw material, intermediate products, finished products, byproducts or waste products and does not discharge that storm water shall not be required to submit an MNOI. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT3 (Mining) Obtaining Coverage:****Submittal/Action Requirements:**

Condition No.	Condition
S-1	<p data-bbox="212 402 590 423"><b>OBTAINING AUTHORIZATION:</b></p> <p data-bbox="212 464 1911 521">(1) Owners and/or operators desiring coverage associated with mining activity under this permit must submit a Mining Notice of Intent (MNOI) and other required submittals in accordance with the requirements of this permit.</p> <p data-bbox="212 557 1394 581">Beginning December 21, 2020, applicants must submit the MNOI electronically as required by 40 CFR 127.16.</p> <p data-bbox="212 621 1911 711">(2) Upon review of the Mining Notice of Intent (MNOI), MDEQ staff may recommend that coverage not be granted, modifications to the SWPPP be made, and/or an alternate permit would be more appropriate. The MDEQ staff recommendations may be brought before the Mississippi Environmental Quality Permit Board (Permit Board) for review and consideration at a regularly scheduled meeting or at a special meeting at its discretion.</p> <p data-bbox="212 751 1766 776">(3) Coverage under this permit will not be granted until all other required MDEQ permits, certifications and approvals are satisfactorily addressed.</p> <p data-bbox="212 816 1911 964">(4) Owners or operators are authorized to discharge storm water and impounded water associated with mining or operate a wastewater recirculation system with no discharge under the terms and conditions of this permit only upon receipt of written notification of approval of coverage by the Permit Board staff. Discharges without written notification of coverage under this permit, issuance of an individual National Pollutant Discharge Elimination System (NPDES) Permit, or a State No Discharge Permit constitutes a violation of the Mississippi Air and Water Pollution Control Law (Miss. Code Ann. Section 49-17-29(2)(b)). [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
S-2	<p data-bbox="212 1011 1146 1032"><b>REQUIRING AN INDIVIDUAL PERMIT OR ALTERNATIVE GENERAL PERMIT:</b></p> <p data-bbox="212 1073 1911 1221">(1) The Permit Board may require any coverage recipient to apply for and obtain either an individual or an alternative general NPDES permit. Any interested person may petition the Permit Board to take action under this paragraph. The Permit Board may require any coverage recipient to apply for an individual NPDES permit only if the owner or operator has been notified in writing. Such notice shall include reasons for the Permit Board's decision, an application form, and a filing deadline. The Permit Board may grant additional time at its discretion, upon request. If a coverage recipient fails to submit a requested application in a timely manner, coverage under this permit will automatically terminate at the end of the day specified for application submittal.</p> <p data-bbox="212 1261 1911 1347">(2) Any coverage recipient may request to be excluded from permit coverage by applying for an individual permit or coverage under another general permit. The applicant shall submit an individual application (EPA Forms 1 and 2D for new discharges, EPA Forms 1 and 2C for existing discharges, EPA Forms 1 and 2F for storm water discharges) or appropriate general permit Notice of Intent Form. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT3 (continued):**

## Submittal/Action Requirements:

Condition No.	Condition
S-3	(3) Coverage under this permit is automatically terminated on the issuance date of the respective alternative individual permit or general permit coverage. When the request for an alternative individual permit or general permit coverage is denied, coverage under this permit continues unless terminated by the Permit Board. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
S-4	<p>HOW TO OBTAIN RECOVERY UNDER THE REISSUED PERMIT:</p> <p>If reissuance of this permit does not occur before its expiration date, continued coverage under this permit will be allowed until the effective date of the reissued general permit coverage. Once the Mining General Permit is reissued, active coverage recipients will receive a Recovery Form with a Letter of Instruction. If a coverage recipient wishes to be covered by the reissued Mining General Permit, the Recovery Form must be completed and returned to the MDEQ in accordance with the provisions of the Letter of Instruction. Resubmittal of the Storm Water Pollution Prevention Plan (SWPPP) is not required if the SWPPP is on-site or locally available, current and adequately addresses the sources of pollution at the facility. Some SWPPP's may require amendment to meet the conditions of the reissued general permit (i.e., modification of sediment basin outfall design). [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT4 (Mining) Mining Notice of Intent (MNOI):**

**Submittal/Action Requirements:**

Condition No.	Condition
S-1	<p><b>MNOI SUBMITTAL:</b></p> <p>Owners or operators desiring coverage under this permit must submit a Mining Notice of Intent (MNOI) Form with the required submittals at least 30 days prior to the anticipated commencement of regulated activities. The form can be submitted at least 15 days prior to the anticipated commencement of activities if the owner or operator has a previously approved Storm Water Pollution Prevention Plan on file with MDEQ and mine dewatering is not proposed.</p> <p>The appropriate section of the MNOI must be completed if the applicant proposes to discharge impounded mine water and/or operate a wastewater recirculation system with no discharge. Unless these specific sections are completed in full, general permit coverage is for the discharge of storm water only. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
S-2	<p><b>REQUIRED SUBMITTALS WITH THE MNOI:</b></p> <p>Submittals required with a completed MNOI include a site-specific Storm Water Pollution Prevention Plan, developed in accordance with ACT5 of this permit and a United States Geological Survey (USGS) quadrangle map or color photocopy, extending at least one-half mile beyond the facility property boundaries with the site location and outfalls outlined, highlighted, or otherwise indicated. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT4 (continued):****Submittal/Action Requirements:**

## Narrative Requirements:

Condition No.	Condition
T-1	<p>WHERE TO OBTAIN THE MNOI FORMS:</p> <p>MNOI forms are contained in the Mining Forms Package or may be obtained from the MDEQ at the address shown below or by calling 601-961-5171. MNOI forms, as well as the general permit, may also be found on the MDEQ web site at <a href="http://www.deq.state.ms.us/MDEQ.nsf/pdf/epd_MiningFormsPackage">http://www.deq.state.ms.us/MDEQ.nsf/pdf/epd_MiningFormsPackage</a>. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-2	<p>WHERE TO SUBMIT THE MNOI:</p> <p>Complete and appropriately signed MNOI Forms must be submitted to:</p> <p style="padding-left: 40px;">Chief, Environmental Permits Division Mississippi Department of Environmental Quality Office of Pollution Control P.O. Box 2261 Jackson, Mississippi 39225</p> <p>For priority or overnight deliveries, the physical address is:</p> <p style="padding-left: 40px;">515 East Amite Street Jackson, Mississippi 39201 [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-3	<p>FAILURE TO NOTIFY:</p> <p>Persons who discharge storm water, impounded water or process wastewater associated with mining activity to waters of the State without an NPDES permit or who operate a wastewater recirculation system with no discharge without a State No Discharge permit are in violation of the Mississippi Air and Water Pollution Control Law (Miss. Code Ann. Section 49-17-29(2)(b)). [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT5 (Mining) Storm Water Pollution Prevention Plan (SWPPP) Development and Content:****Narrative Requirements:**

Condition No.	Condition
T-1	<p data-bbox="212 397 506 418"><b>SWPPP DEVELOPMENT:</b></p> <p data-bbox="212 464 1913 581">The owner or operator of a mining operation shall develop and implement a site-specific storm water pollution prevention plan (SWPPP). The SWPPP shall be developed with sound engineering and best management practices. The SWPPP shall identify all potential pollution sources that may affect the quality of storm water associated with mining. The SWPPP shall describe and ensure the implementation of best management practices, which will reduce pollutants in storm water discharges and assure compliance with the terms and conditions of this permit. The plan shall:</p> <ol data-bbox="212 617 1913 1162" style="list-style-type: none"> <li data-bbox="212 617 548 638">(1) Be signed per ACT 15, T-4.</li> <li data-bbox="212 683 1052 704">(2) Be located at the mining site for which it was approved or locally available.</li> <li data-bbox="212 750 1230 771">(3) Provide for compliance with the terms of the plan upon commencement of mining activities.</li> <li data-bbox="212 816 1913 870">(4) Be submitted to the appropriate municipal or county authority upon request, if storm water from the mining site discharges into a municipal separate storm sewer system.</li> <li data-bbox="212 915 1913 1032">(5) Be modified by the owner or operator if MDEQ staff determines it does not meet the requirements of this permit or it has been determined that the plan does not adequately protect waters of the State after commencement of mining operations. The owner or operator shall have thirty (30) days to modify the SWPPP and submit it to MDEQ after having been notified. The modified SWPPP shall be implemented after MDEQ notifies the owner or operator that the revised SWPPP is acceptable or coverage has been issued.</li> <li data-bbox="212 1078 1913 1162">(6) Be amended thirty (30) days prior to a change in the size, design, construction, operation, or maintenance of the mining facility. Any change to the size, design, construction, operation, or maintenance of the mining facility will be allowed only after the amended SWPPP has been approved and the owner or operator has been notified in writing by MDEQ. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</li> </ol>

**ACT5 (continued):**

## Narrative Requirements:

Condition No.	Condition
T-2	<p data-bbox="212 396 688 420"><b>EROSION AND SEDIMENT CONTROLS:</b></p> <p data-bbox="212 461 1923 672">The owner or operator shall design, install, and maintain controls in accordance with the standards set forth in the most recent edition of Mississippi's "Erosion Control, Sediment Control and Stormwater Management on Construction Sites and Urban Areas (Three Volumes) ," other recognized manuals for storm water controls design, or provide a design that has been certified by a Mississippi registered professional engineer. "Erosion Control, Sediment Control and Stormwater Management on Construction Sites and Urban Areas (Three Volumes)" can be accessed at <a href="http://www.deq.state.ms.us/MDEQ.nsf/page/epd_epdgeneral">http://www.deq.state.ms.us/MDEQ.nsf/page/epd_epdgeneral</a>. These controls shall be appropriate for the mining activities, which may include but not be limited to removing, stockpiling, and restoring any overburden; removing, processing, stockpiling and shipping mined material; and storing or disposing of any waste product generated during the mining activity. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-3	<p data-bbox="212 712 1923 834">The SWPPP shall list and describe site-specific controls appropriate for the mining/construction activities as well as the procedures for implementing such controls. Controls shall be designed, installed, and maintained to retain sediment on-site and to minimize the discharge of pollutants. If any of the below controls cannot be implemented on the site, the SWPPP must include written justification as to why site-specific constraints and/or costs make the control(s) infeasible. At a minimum, such controls must be designed, installed and maintained to:</p> <ol data-bbox="212 867 1923 1317" style="list-style-type: none"> <li>(1) Control storm water volume and velocity within the site to minimize soil erosion;</li> <li>(2) Control storm water discharges, including both peak flow rates and total storm water volume, to minimize erosion at outlets and to minimize downstream channel and stream bank erosion;</li> <li>(3) Minimize the amount of soil exposed during mining activity;</li> <li>(4) Minimize the disturbance of steep slopes;</li> <li>(5) Minimize sediment discharges from the site. The design, installation and maintenance of erosion and sediment controls must address factors such as the amount, frequency, intensity and duration of precipitation, the nature of resulting storm water runoff, and soil characteristics, including the range of soil particle sizes expected to be present on the site;</li> <li>(6) Provide and maintain natural buffers around surface waters, direct storm water to vegetated areas to increase sediment removal and maximize storm water infiltration, unless infeasible (see buffer zone requirements in ACT9);</li> <li>(7) Minimize soil compaction and, unless infeasible, preserve topsoil;</li> <li>(8) Direct storm water to vegetated areas, brush barriers, silt fences, hay bales, etc. to aid in the filtration, infiltration, velocity reduction and diffusion of the discharge;</li> <li>(9) Transport runoff down steep slopes through lined channels or piping;</li> <li>(10) Minimize off-site vehicle tracking of sediments. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</li> </ol>

**ACT5 (continued):**

## Narrative Requirements:

Condition No.	Condition
T-4	<p>As a minimum, the controls must be in accordance with the standards set forth in the most current edition of the "Erosion Control, Sediment Control and Stormwater Management on Construction Sites and Urban Areas (Three Volumes)" or other recognized manual of design. The SWPPP shall address the following minimum components.</p> <p>(1) A scaled site map shall be prepared showing boundaries of property and proposed mining site, buffer zone compliance, original and proposed contours (if practicable), drainage patterns, adjacent receiving water bodies, north arrow, all erosion and sediment controls (vegetative and structural), and the location of housekeeping practices.</p> <p>(2) Vegetative practices shall be designed to preserve existing vegetation where possible and re-vegetate disturbed areas as soon as practicable after clearing, grading, excavating or other land disturbing activities. Such practices may include, but are not limited to, surface roughening, temporary seeding, permanent seeding, mulching, sod stabilization, vegetative buffer strips, protection of trees, and topsoil preservation. When a disturbed area not actively being mined will be left undisturbed for 30 days or more, the appropriate temporary or permanent vegetative practices shall be implemented within seven (7) calendar days. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p> <p>(3) Structural practices shall divert flows from exposed soils, store flows or otherwise limit runoff from exposed areas. Such practices may include, but are not limited to, construction entrance/exit, silt fences, earth dikes, brush barriers, drainage swales, check dams, subsurface drains, pipe slope drains, level spreaders, drain inlet protection, outlet protection, detention/retention basins, sediment traps, temporary sediment basins or equivalent sediment controls. Because mining is generally of long duration, temporary measures such as hay bales will not, as a stand alone practice, be accepted to satisfy structural requirements due to their associated high maintenance frequency. However, they may be used in conjunction with other structural practices, such as strengthening silt fences.</p> <p>(4) Construction exits (see Definition) shall be installed wherever traffic will be leaving a mining site and moving directly onto a paved public road.</p> <p>(5) Temporary (or permanent) sediment basins, if used, shall provide at least 3600 cubic feet (133 cubic yards) of storage per acre drained and shall be provided until final stabilization of the site. Sediment basins must be installed before major site grading and utilize outlet structures that withdraw water from the surface.</p> <p>(6) A description of post-mining control measures for "Exempt Operations." Post-mining control measures shall be installed to control pollutants in storm water after mining is complete. These controls include, but are not limited to, one or more of the following: on-site infiltration of runoff, flow attenuation using open vegetated swales and natural depressions, constructed wetlands, lakes, ponds and retention/detention structures. Velocity dissipation devices shall be placed at detention or retention pond outfalls and along the outfall channel to provide for a non-erosive flow. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT5 (continued):**

## Narrative Requirements:

Condition No.	Condition
T-5	<p><b>NON-STORM WATER DISCHARGE MANAGEMENT:</b></p> <p>The SWPPP must identify any allowable non-storm water discharges, identified in ACT 2, T-3, except for flows from actual fire fighting, which are combined with storm water discharges associated with mining activity at the site. Non-storm water discharges should be eliminated or reduced to the extent feasible. The SWPPP must identify and ensure the implementation of appropriate Best Management Practices (BMPs) for the non-storm water component of the discharge. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-6	<p><b>IMPLEMENTATION OF CONTROLS:</b></p> <p>The SWPPP shall require the owner/operator during mining preparation (e.g. clearing and grubbing) to implement controls necessary to mitigate erosion and adverse impacts to offsite areas and receiving streams. During and after mining, vegetative and structural practices shall be maintained as set forth in the approved SWPPP. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-7	<p><b>IMPLEMENTATION SEQUENCE:</b></p> <p>The owner or operator shall prepare an implementation sequence which coordinates the timing of all major land-disturbing activities together with the necessary erosion and sedimentation control measures planned for the project. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-8	<p><b>MAINTENANCE AND MONTHLY INSPECTIONS:</b></p> <p>The SWPPP shall describe procedures to maintain vegetation, erosion and sediment controls and other protective measures. Procedures shall provide that all erosion controls and outfalls/discharge points are inspected a minimum of once per month and after rain events in accordance with ACT7, S-1. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT5 (continued):**

S-1	<p data-bbox="212 412 758 433"><b>SWPPP IMPLEMENTATION REQUIREMENTS:</b></p> <p data-bbox="212 472 520 500">The coverage recipient shall:</p> <ol style="list-style-type: none"> <li data-bbox="212 532 1911 592">(1) Implement the SWPPP and retain a copy of the SWPPP at the permitted site or locally available (see Definition). Failure to implement the SWPPP is a violation of permit requirements. A copy of the SWPPP must be made available to the MDEQ inspectors for review at the time of an on-site inspection.</li> <li data-bbox="212 625 1486 652">(2) Ensure that appropriate Best Management Practices (BMPs) are in place upon commencement of mining operations.</li> <li data-bbox="212 685 1911 776">(3) Amend the SWPPP if notified at any time by the Executive Director of MDEQ that the SWPPP does not meet the minimum requirements. A written certification must also be submitted to the Executive Director stating that the requested changes have been made. Unless otherwise provided, the requested changes shall be made within 15 days.</li> <li data-bbox="212 808 1911 899">(4) Amend the SWPPP whenever there is a change in design, construction, operation, or maintenance which may potentially affect the discharge of pollutants to waters of the State or if the SWPPP proves to be ineffective in controlling storm water pollutants. The amended SWPPP shall be submitted to MDEQ within 30 days of amendment.</li> <li data-bbox="212 932 1911 992">(5) Submit to MDEQ the Major Modification Form (see Mining Forms Package) for subsequent phases, expansions and modifications of mining development that are proposed but were not included in the original SWPPP.</li> <li data-bbox="212 1024 1911 1084">(6) Install needed erosion controls, even if they may be located in the way of subsequent activities. It shall not be an acceptable defense that controls were not installed because subsequent activities would require their replacement or cause their destruction. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</li> <li data-bbox="212 1117 1911 1177">(7) Install additional and/or alternative erosion and sediment controls when existing controls prove to be ineffective in preventing sediment from leaving the site.</li> <li data-bbox="212 1209 758 1237">(8) Minimize off-site vehicle tracking of sediments.</li> <li data-bbox="212 1269 1703 1299">(9) Comply with applicable State and local waste disposal, sanitary sewer or septic system regulations. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</li> </ol>

**ACT6 (continued):****Submittal/Action Requirements:**

Condition No.	Condition
S-2	<p>(10) Maintain all erosion controls. Except for sediment basins, all accumulated sediment shall be removed from structural controls when sediment deposits reach one-third to one-half the height of the control. For sediment basins, accumulated sediment shall be removed when the capacity has been reduced by 50%. All removed sediment deposits shall be properly disposed. Non-functioning controls shall be repaired, replaced or supplemented with functional controls within 24 hours of discovery or as soon as field conditions allow.</p> <p>(11) Implement steps necessary to meet a specific wasteload allocation established subsequent to coverage issuance. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
S-3	<p><b>REQUIREMENT TO IDENTIFY MINE BOUNDARIES:</b></p> <p>Boundaries of areas issued a Certificate of Coverage under this permit shall be marked and durable posts shall be placed at the corners of the coverage area. The posts shall be painted or flagged to be readily visible during the life of the operation. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
S-4	<p><b>SWPPP COMPLIANCE WITH LOCAL STORM WATER ORDINANCES:</b></p> <p>(1) The SWPPP shall be in compliance with all local storm water ordinances.</p> <p>(2) When storm water discharges into a Municipal Separate Storm Sewer System (MS4), the coverage recipient shall make the SWPPP available to the local authority upon request. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT7 (Mining) Site Inspection and SWPPP Evaluation:**

## Submittal/Action Requirements:

Condition No.	Condition
S-1	<p data-bbox="212 402 588 423">INSPECTION REQUIREMENTS:</p> <p data-bbox="212 467 1908 526">The coverage recipient shall perform inspections of all receiving streams (if feasible), outfalls, erosion and sediment controls, and other SWPPP requirements upon receipt of coverage and throughout permit coverage:</p> <p data-bbox="212 561 428 583">(1) At least monthly</p> <p data-bbox="212 623 1908 678">(2) Within 24 hours after commencement of a rainfall event equal to or greater than a 2-year, 24-hour storm event (approximately 6-inches on the Gulf Coast to 4 inches at the Mississippi-Tennessee State Line)</p> <p data-bbox="212 719 1908 776">(3) As necessary to ensure that erosion controls have been constructed, maintained, and function adequately to satisfy the requirements of this permit and to ensure that pollutants are not leaving the site. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT8 (Mining) Recordkeeping Requirements:**

## Recordkeeping Requirements:

Condition No.	Condition
R-1	<p>RECORDS RETENTION:</p> <p>All records, reports, forms and information resulting from activities required by this permit shall be retained for a period of at least three (3) years from the date that the document(s) was (were) generated. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
R-2	<p>MONTHLY INSPECTION DOCUMENTATION:</p> <p>Monthly inspections, as described in ACT 7, shall be documented on copies of the Site Inspection Report and Certification Form provided in the Mining Forms Package (or equivalent form) and be kept with the SWPPP. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT9 (Mining) Water Quality and Buffer Zone Requirements:****Limitation Requirements:**

Condition No.	Condition
L-1	<p data-bbox="212 407 783 428"><b>NON-NUMERIC LIMITATION REQUIREMENTS:</b></p> <p data-bbox="212 467 663 488">Storm water discharges shall be free from:</p> <ul style="list-style-type: none"> <li data-bbox="212 527 1037 548">(1) Debris, oil, scum, and other floating materials other than in trace amounts,</li> <li data-bbox="212 587 1291 609">(2) Eroded soils and other materials that will settle to form objectionable deposits in receiving waters,</li> <li data-bbox="212 647 1157 669">(3) Suspended solids, turbidity, and color at levels inconsistent with the receiving waters,</li> <li data-bbox="212 708 1822 729">(4) Chemicals in concentrations that would cause violation of State Water Quality Criteria in the receiving waters. [11 Miss. Admin. Code Pt. 6, Ch. 2.]</li> </ul>
L-2	<p data-bbox="212 777 926 799"><b>BUFFER ZONE REQUIREMENTS FOR MINING ACTIVITIES:</b></p> <p data-bbox="212 842 1911 959">When a mining activity is adjacent to a stream, a buffer zone (natural or undisturbed greenbelt on the perimeter of a land disturbing activity) shall be maintained between the edge of the mining activity and the highest point of the top bank of the stream. The buffer zone shall not be disturbed by any mining activities. Mining activity includes, but is not limited to, extraction operations, stockpiling of overburden, fill dirt, or sand and gravel, and sedimentation ponds. The buffer zone requirements for mining activity adjacent to streams are as follows:</p> <ul style="list-style-type: none"> <li data-bbox="212 1003 1911 1089">(1) Intermittent Streams. Mining activities adjacent to intermittent streams shall normally have a 50-foot buffer zone. Intermittent streams will generally be indicated by a broken blue line on the latest version of the United States Department of the Interior Geological Survey Quadrangle Map (Scale 1:24,000, 7.5 minute series).</li> <li data-bbox="212 1133 1911 1219">(2) Perennial Streams. Mining activities adjacent to perennial streams shall normally have a 150-foot buffer zone. Perennial streams will generally be indicated by a solid blue line on the latest version of the United States Department of the Interior Geological Survey Quadrangle Map (Scale 1:24,000, 7.5 minute series). When a perennial stream is also classified as a navigable waterway, the requirements regarding navigable waterways shall be applied.</li> <li data-bbox="212 1252 1911 1308">(3) Navigable Waterways. Mining activities adjacent to navigable waterways shall normally have a 300-foot buffer zone. Navigable waterways are defined and designated by the U. S. Army Corps of Engineers pursuant to Section 10 of the Rivers and Harbors Act. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</li> </ul>

**ACT10 (Mining) Mining Activities Considered "Exempt Operations":**

## Narrative Requirements:

Condition No.	Condition
T-1	<p>WHERE TO OBTAIN THE "NOTICE OF EXEMPT OPERATIONS" FORM:</p> <p>The form may be found in the Mining Forms Package or may be obtained by calling 601-961-5171. It may also be found on the MDEQ web site at <a href="http://www.deq.state.ms.us/mdeq.nsf/pdf/epd_MiningFormsPackage">http://www.deq.state.ms.us/mdeq.nsf/pdf/epd_MiningFormsPackage</a>. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-2	<p>Mining operations that are considered exempt from obtaining an Office of Geology Surface Mining Permit must submit a "Notice of Exempt Operations" with the MNOI or proof of previous submittal to the Office of Geology. To be considered an "Exempt Operation" under the Mississippi Surface Mining Reclamation Rules and Regulations, the operation must meet the following definition: A mining operation with an area equal to or less than four (4) acres and is greater than one thousand three hundred and twenty (1320) feet from any other affected area if:</p> <p>(1) The operation began before July 1, 2002, and the operator notified the Department of the commencement, expansion or resumption of the operation before July 1, 2002; or</p> <p>(2) The operation commenced after July 1, 2002, and the operator notified the Department at least seven (7) calendar days before commencement or expansion of the operation. The seven day notice prior to mining requirement shall be waived and the operator may begin mining immediately after notifying the Department [if all applicable permits and permit coverages have been obtained] and if:</p> <p>(A) The operator agrees, in the notification, to reclaim the mine site in accordance with the minimum standards adopted by the Mississippi Commission on Environmental Quality (Commission); or</p> <p>(B) The exempted operation is conducted for Mississippi Department of Transportation (MDOT) projects or state aid road construction projects funded in whole or in part by public funds. [11 Miss. Admin. Code Pt. 8, Ch. 1.]</p>

**ACT11 (Mining) Wastewater Recirculation Systems with No Discharge to Surface Waters:**

## Narrative Requirements:

Condition No.	Condition
T-1	<p><b>ELIGIBILITY:</b></p> <p>Mining activities that operate one of the following processes are subject to the requirements listed below, in addition to the applicable requirements of ACTs 1 through 9 and 13 through 16 of this permit:</p> <p>(1) Wash operations with closed loop recirculation system and no discharge of wash wastewater</p> <p>(2) Hydraulic dredge operation with closed loop recirculation system and no discharge of dredge wastewater</p> <p>(3) Combination of processes (1) and (2) above. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-2	<p><b>REMOVED SUBSTANCES:</b></p> <p>Solids, sludges, filter backwash, or other residuals removed in the course of treatment or control of wastewater shall be disposed of in a manner such as to prevent such materials from entering waters of the State and in a manner consistent with the Mississippi Solid Waste Disposal Act, the Federal Resource Conservation and Recovery Act, and the Mississippi Water Pollution Control Act. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-3	<p><b>POWER FAILURES:</b></p> <p>If electric power is required to maintain compliance with the conditions and prohibitions of the permit, the coverage recipient shall either:</p> <p>(1) Provide an alternative power source to operate the wastewater control facilities; or</p> <p>(2) Halt, reduce, or otherwise control production and/or all wastewater flows upon reduction, loss, or failure of the primary source of power to the wastewater control facilities. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT11 (continued):**

## Narrative Requirements:

---

Condition No.	Condition
------------------	-----------

---

## T-4      STRUCTURAL INTEGRITY:

(1) Any lagoon, sedimentation pond, or dredge pit must have an emergency discharge structure installed at least 24 inches above the normal operating fluid level, with said discharge structure being at least 24 inches below the lowest point on the top of the containment dike.

(2) Dikes, levees and any other appurtenant structures must be constructed utilizing good engineering designs, standards, methodologies and materials. A professional engineer, registered in the State of Mississippi, shall certify the adequacy of construction.

(3) Dikes or levees shall be maintained in good working order at all times. There shall be no leaks through dikes and any damaged dike shall be replaced or repaired immediately upon discovering any deficiency. All earthen dikes shall be maintained with adequate cover, such that the effects of erosion are minimized.

(4) Dams and levees must be constructed within the guidelines of the Dam Safety Regulations, 11 Miss. Admin. Code Pt. 7, Ch. 3. unless the dam meets the exemption criteria as outlined in Rule 3.2.B(2)(a)-(c) of said regulations. Prior to coverage being granted under this permit, authorization to construct must be issued for dams or levees not meeting the exemption criteria. Please be aware that a dam or levee meeting the exemption criteria but having the potential to threaten downstream lives or man-made structures must also contact the Dam Safety Division.

(5) The coverage recipient shall develop and maintain a daily inspection log for this facility. This log should include but not be limited to the following;

(A) Condition of all dikes or levees

(B) Observance of the area around the dike to indicate any water pollution problems

(C) Volume of wastewater accumulating within the impoundment

(D) Date, time and person making the inspection

(E) An indication that:

-Follow-up action is required

-No Follow-up action is required. [11 Miss. Admin. Code Pt. 6, Ch. 1.]

**ACT12 (Mining) Mine Dewatering:****Submittal/Action Requirements:**

Condition No.	Condition
S-1	<p><b>REPORTING:</b></p> <p>The coverage recipient shall submit analytical results of monitoring conducted according to the provisions of T-3 of this ACT on a Discharge Monitoring Report (DMR) due annually by the 28<sup>th</sup> of January. DMRs shall be submitted electronically using the MDEQ NetDMR system (ref. NPDES Electronic Reporting Rule promulgated at 40 CFR 127 on October 22, 2015). Instructions for NetDMR registration can be found on MDEQ's website at: <a href="http://www.deq.state.ms.us/MDEQ.nsf/page/NetDMR_NetDMRClassroomTraining">http://www.deq.state.ms.us/MDEQ.nsf/page/NetDMR_NetDMRClassroomTraining</a>. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**Narrative Requirements:**

Condition No.	Condition
T-1	<p><b>ELIGIBILITY:</b></p> <p>This permit allows discharges of "mine dewatering", as defined in ACT16, subject to the following conditions and the applicable requirements of ACTs 1 through 9 and 13 through 16 of this permit. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-2	<p><b>EROSION AND SEDIMENT CONTROLS:</b></p> <p>All water shall be discharged to well-vegetated and/or stabilized areas in a manner to prevent erosion of materials and soils into surface waters. This BMP shall be located on the site map required by ACT5, T-4. The intake of dewatering devices should draw from the upper third of the water column to minimize solids in the discharge. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT12 (continued):**

## Narrative Requirements:

Condition No.	Condition
T-3	<p>MONITORING REQUIREMENTS FOR MINE DEWATERING:</p> <p>(1) Frequency and Location of Monitoring. The coverage recipient shall monitor the effluent for pH in accordance with Table 1 in this ACT by collecting grab samples at least once every 12 months after permit issuance. Samples should be collected at the nearest point after discharge, but prior to mixing with any non-mine water or mixing with the receiving stream.</p> <p>(2) Representative Sampling. Samples and measurements taken as required herein shall be representative of the volume and nature of the monitored wastewater.</p> <p>(3) Test Procedures. Sampling test procedures shall be in accordance with the methods set forth in 40 CFR Part 136. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

## Recordkeeping Requirements:

Condition No.	Condition
R-1	<p>RECORDKEEPING REQUIREMENTS FOR MINE DEWATERING:</p> <p>Recording of Results. For each measurement or sample taken pursuant to the requirements of this permit, the coverage recipient shall retain records for a minimum of three (3) years of all information obtained from such monitoring including:</p> <ol style="list-style-type: none"> <li>(1) The exact place, date and time of sampling</li> <li>(2) The dates and times the analyses were performed</li> <li>(3) The person(s) who performed the analyses</li> <li>(4) The analytical techniques, procedures or methods used</li> <li>(5) The results of all required analyses</li> </ol> <p>If the coverage recipient monitors any pollutant as prescribed in the permit more frequently than required by the permit using test procedures approved under 40 CFR Part 136, the results of this monitoring shall be recorded according to the above provisions and included in any determinations of facility compliance status. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**Table 1:        Limitations and Monitoring Requirements for Mine Dewatering****RPNT0000000001: Mining**

Such discharges shall be limited and monitored by the coverage recipient as specified below:

Parameter	Discharge Limitations							Monitoring Requirements		
	Quantity / Loading Average	Quantity / Loading Maximum	Quantity / Loading Units	Conc. / Quality Minimum	Conc. / Quality Average	Conc. / Quality Maximum	Conc. / Quality Units	Frequency	Sample Type	Which Months
<i>pH Effluent</i>	*****	*****	*****	6.0 Minimum	*****	9.0 Maximum	SU	Annually	Grab Sampling	Jan-Dec

**ACT13 (Mining) Personnel Training Requirements:****Submittal/Action Requirements:**

Condition No.	Condition
S-1	<p><b>TRAINING DOCUMENTATION:</b></p> <p>Personnel training conducted to meet the requirements of this ACT shall be documented. Training records shall include employee's name, worker identification number, date of training, contents of training, and the employee's signature acknowledging that training was received. All training records shall be maintained for at least three years from the date of training. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
S-2	<p><b>TRAINING PROGRAM REQUIREMENTS:</b></p> <p>The coverage recipient shall develop and implement a program for initial and periodic refresher training of personnel that are responsible for implementing and/or complying with the requirements of this permit. Initial training for all personnel that are responsible for implementing and/or complying with the requirements of this permit shall be performed within twelve (12) months of issuance of coverage or recoverage under this permit. Newly hired employees responsible for implementing and/or complying with the requirements of this permit shall receive initial training prior to performing such responsibilities.</p> <p>Training shall at a minimum address, but not be limited to, the following elements:</p> <p>(1) SWPPP goals and plan components identified in ACTs 5 through 7 of this permit, including:</p> <p>(A) Housekeeping and pollution prevention requirements,</p> <p>(B) Spill prevention and response procedures,</p> <p>(C) Installation, maintenance and inspection of erosion and sediment controls Best Management Practices (BMPs).</p> <p>(2) Procedures for monitoring compliance with mine dewatering requirements as prescribed in ACT 12 (if applicable);</p> <p>(3) Procedures to ensure compliance with the “no discharge” requirement of ACT11 (if applicable);</p> <p>(4) Recordkeeping, reporting and record retention requirements (includes understanding the records filing system and being able to produce the required permit documentation during an MDEQ on-site inspection). [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT14 (Mining) Termination of Permit Coverage:****Submittal/Action Requirements:**

Condition No.	Condition
S-1	<p data-bbox="212 402 596 423"><b>TERMINATION OF COVERAGE:</b></p> <p data-bbox="212 464 1911 553">Coverage shall be terminated at the request of the coverage recipient only after mining activities have permanently stopped, vegetation has been successfully established, and any permanent controls are stable. Inspections must continue until such time the coverage recipient has received written notice of coverage termination by MDEQ.</p> <p data-bbox="212 586 1911 643">(1) For non-exempt mining operations, a complete Request For Termination (RFT) of Coverage Form (see Mining Forms Package) and a copy of the Permit Board Order, authorizing 90% or final release of the mining performance bond, shall be submitted to MDEQ.</p> <p data-bbox="212 675 1911 821">(2) For exempt mining operations, within 30 days of final stabilization (see Definition of Final Stabilization in ACT16) for a covered site, a completed Request For Termination (RFT) of Coverage Form (provided in the Mining Forms Package) shall be submitted to the Permit Board. Upon receiving the completed RFT, the MDEQ staff will inspect the site. If no sediment and erosion control problems are identified and adequate permanent controls are established, the owner or operator will receive a termination letter. Coverage is not terminated until notified in writing by MDEQ. Failing to submit a RFT is a violation of permit conditions.</p> <p data-bbox="212 854 1730 885">Beginning December 21, 2020, the RFT must be submitted electronically as required by 40 CFR 127.16. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT15 (Mining) Standard Requirements Applicable to All Water Permits:**

## Narrative Requirements:

Condition No.	Condition
T-1	<p><b>DUTY TO COMPLY:</b></p> <p>The coverage recipient must comply with all conditions of this permit. Any permit noncompliance constitutes a violation and is grounds for enforcement action, coverage termination, revocation and reissuance, or modification, or denial of a renewal application. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-2	<p><b>DUTY TO MITIGATE:</b></p> <p>The owner or operator shall take all reasonable steps to minimize or prevent any discharge in violation of this permit which is likely to adversely affect human health or the environment. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-3	<p><b>DUTY TO PROVIDE INFORMATION:</b></p> <p>The owner or operator shall furnish to the Permit Board, within a reasonable time, any relevant information which the Permit Board may request to determine whether cause exists for modifying, revoking and reissuing, or terminating coverage, or to determine compliance with this permit. The owner or operator shall also furnish to the Permit Board, upon request, copies of records required to be kept by this permit. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT15 (continued):**

## Narrative Requirements:

---

Condition No.	Condition
------------------	-----------

---

## T-4 SIGNATORY REQUIREMENTS:

All MNOIs, Requests for Recoverage, Major Modification Forms, Requests for Transfer, and Requests for Termination shall be signed as follows:

(1) For a corporation by a responsible corporate officer. For this permit, a responsible corporate officer means:

(A) A president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation; or

(B) The manager of one or more manufacturing, production or operating facilities, provided, the manager is authorized to make management decisions which govern the operation of the regulated facility including having the explicit or implicit duty of making major capital investment recommendations, and initiating and directing other comprehensive measures to assure long term environmental compliance with environmental laws and regulations; the manager can ensure that the necessary systems are established or actions taken to gather complete and accurate information for permit application requirements; and where authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;

Note: MDEQ does not require specific assignments or delegations of authority to responsible corporate officers identified in paragraph (1)(A) above. The Department will presume that these responsible corporate officers have the requisite authority to sign permit applications unless the corporation has notified the Permit Board to the contrary. Corporate procedures governing authority to sign permit applications may provide for assignment or delegation to applicable corporate positions under paragraph (1)(B) above rather than to specific individuals.

(2) For a partnership or sole proprietorship by a general partner or the proprietor, respectively; or

(3) For a municipal, State, Federal, or other public agency by either a principal executive officer or ranking elected official. For purposes of this section, a principal executive officer of a Federal agency includes: a) the chief executive officer of the agency, or b) a senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency. [11 Miss. Admin. Code Pt. 6, Ch. 1.]

**ACT15 (continued):**

## Narrative Requirements:

Condition No.	Condition
T-5	<p><b>DULY AUTHORIZED REPRESENTATIVE:</b></p> <p>All SWPPPs, reports required by this permit, certifications, and other information requested by the Permit Board shall be signed by a person described in ACT 15, T-4 above, or by a duly authorized representative of that person. A person is a duly authorized representative when:</p> <p>(1) The authorization is made in writing and submitted to the Permit Board by a person described in ACT 15, T-4 above.</p> <p>(2) The authorization specifies either an individual or a position having responsibility for the overall operation of the regulated activity, such as: manager, operator of a well or well field, superintendent, person of equivalent responsibility, or an individual or position having overall responsibility for environmental matters for the company. (A duly authorized representative may be either a specified individual or position). [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-6	<p><b>CHANGES IN AUTHORIZATION:</b></p> <p>If an authorization is no longer accurate because a different individual or position has permit responsibility, a new authorization satisfying the requirements of ACT 15, T-4 and T-5 must be submitted to the Permit Board prior to or together with any reports, information or applications signed by the representative. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-7	<p><b>CERTIFICATION:</b></p> <p>Any person signing documents under this section shall make the following certification:</p> <p>"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations." [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-8	<p><b>OIL AND HAZARDOUS SUBSTANCE LIABILITY:</b></p> <p>Nothing in this permit shall relieve the owner or operator from responsibilities, liabilities, or penalties under Section 311 of the Federal Clean Water Act (33 U.S.C. Section 1321). [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT15 (continued):**

## Narrative Requirements

Condition No.	Condition
T-9	<p><b>PROPERTY RIGHTS:</b></p> <p>The issuance of this permit does not convey any property rights of any sort, nor any exclusive privileges, nor does it authorize any injury to private property nor any invasion of personal rights, nor any infringement of Federal, State or local laws or regulations. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-10	<p><b>SEVERABILITY:</b></p> <p>The provisions of this permit are severable. If any provision of this permit, or the application of any provision of this permit to any circumstance, is challenged or held invalid, the validity of the remaining permit provisions and/or portions thereof or their application to other persons or sets of circumstances, shall not be affected thereby. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-11	<p><b>TRANSFERS:</b></p> <p>Coverage under this permit is not transferable to any person except after notice to and approval by the Permit Board. The Permit Board may require the coverage recipient to obtain another NPDES permit. Transfer of coverage requests shall be submitted to the Permit Board using the form provided in the Mining Forms Package. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-12	<p><b>PROPER OPERATION AND MAINTENANCE:</b></p> <p>The owner or operator shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the owner or operator to achieve compliance with the conditions of this permit, including the Storm Water Pollution Prevention Plan. Proper operation and maintenance includes adequate laboratory controls with appropriate quality assurance procedures and requires the operation of backup or auxiliary facilities when necessary to achieve compliance with permit conditions. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT15 (continued):**

## Narrative Requirements:

Condition No.	Condition
T-13	<p><b>BYPASS PROHIBITION:</b></p> <p>Bypass (see 40 CFR 122.41(m)) is prohibited and enforcement action may be taken against an owner or operator for a bypass, unless: a) the bypass was unavoidable to prevent loss of life, personal injury, or severe property damage; b) there were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime (this condition is not satisfied if the owner or operator should, in the exercise of reasonable engineering judgment, have installed adequate backup equipment to prevent a bypass which occurred during normal periods of equipment downtime or preventive maintenance); and c) the owner or operator submitted notices per ACT 15, T-17 and/or T-18. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-14	<p><b>UPSET CONDITIONS:</b></p> <p>An upset (see 40 CFR 122.41(n)) constitutes an affirmative defense to an action brought for noncompliance with technology-based permit limitations if a coverage recipient shall demonstrate, through properly signed, contemporaneous operating logs, or other relevant evidence, that: 1) an upset occurred and the coverage recipient can identify the specific cause(s) of the upset; 2) the permitted facility was at the time being properly operated at the time of the upset; 3) the coverage recipient submitted notices per ACT 15, T-17 and/or T-18; and 4) the coverage recipient took remedial measures as required under ACT 15, T-2. In any enforcement proceeding, the coverage recipient has the burden of proof that an upset occurred. No determination made during administrative review of claims that noncompliance was caused by upset, and before an action for noncompliance is initiated, will be considered a final administrative action subject to judicial review. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-15	<p><b>INSPECTION AND ENTRY:</b></p> <p>The owner or operator shall allow the Permit Board staff or an authorized representative, upon the presentation of credentials and other documents as may be required by law, to:</p> <ol style="list-style-type: none"> <li>(1) Enter upon the owner's or operator's premises where a regulated activity is located or conducted or where records must be kept under the conditions of this permit;</li> <li>(2) Have access to and copy at reasonable times any records that must be kept under the conditions of this permit; and</li> <li>(3) Inspect at reasonable times any facilities or equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit; and</li> <li>(4) Sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by the Clean Water Act, any substances or parameters at any location. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</li> </ol>

**ACT15 (continued):**

## Narrative Requirements:

Condition No.	Condition
T-16	<p>PERMIT ACTIONS:</p> <p>This permit may be modified, revoked and reissued, or terminated for cause. A request by the owner or operator for permit or coverage modification, revocation and reissuance, or termination, or a certification of planned changes or anticipated noncompliance does not stay any permit condition. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-17	<p>ANTICIPATED NONCOMPLIANCE:</p> <p>The owner or operator shall give at least 10 days advance notice, if possible, before any planned noncompliance with permit requirements. Giving notice of planned or anticipated noncompliance does not immunize the coverage recipient from enforcement action for that noncompliance. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-18	<p>UNANTICIPATED NONCOMPLIANCE:</p> <p>The owner or operator shall notify MDEQ orally within 24 hours from the time he or she becomes aware of unanticipated noncompliance, which may endanger health or the environment. A written report shall be provided to MDEQ within five (5) working days of the time he or she becomes aware of the circumstances leading to the unanticipated noncompliance. The report shall describe the cause, the exact dates and times, steps taken or planned to reduce, eliminate, or prevent reoccurrence and, if the noncompliance has not ceased, the anticipated time for correction. MDEQ may waive the written report on a case-by-case basis, if the oral report is received within 24 hours. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-19	<p>REOPENER CLAUSE:</p> <p>If there is evidence indicating potential or realized impacts on water quality due to discharges covered by this permit, the owner or operator may be required to obtain an individual permit or an alternative general permit in accordance with ACT 3, S-2, or the permit may be modified to include different limitations and/or requirements. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-20	<p>PERMIT MODIFICATION:</p> <p>Permit modification or revocation will be conducted according to 40 CFR 122.62, 122.63, 122.64 and 124.5. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

**ACT15 (continued):**

## Narrative Requirements:

Condition No.	Condition
T-21	<p>CONTINUATION OF EXPIRED GENERAL PERMIT:</p> <p>If this permit is not reissued prior to the expiration date, it will be administratively continued and remain in force and effect. Permit coverage will remain until the earliest of:</p> <ul style="list-style-type: none"> <li>(1) Recoverage under the reissued general permit;</li> <li>(2) Submittal of a Request for Termination and receipt of written concurrence;</li> <li>(3) Issuance of an individual permit for the project's discharge; or</li> <li>(4) A formal permit decision by the Permit Board to not reissue the general permit, at which time the coverage recipient must seek coverage under an alternative general permit or an individual permit. [11 Miss. Admin. Code Pt. 6, Ch. 1]</li> </ul>
T-22	<p>FALSIFYING REPORTS:</p> <p>Any coverage recipient who falsifies, tampers with, or knowingly renders inaccurate any monitoring device or method required by the Permit Board to be maintained as a condition in a permit, or who alters or falsifies the results obtained by such devices or methods and/or any written report required by or in response to a permit condition, shall be deemed to have violated a permit condition and shall be subject to the penalties provided for a violation of a permit condition pursuant to Miss. Code Ann. Section 49-17-43. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-23	<p>CIVIL AND CRIMINAL LIABILITY:</p> <ul style="list-style-type: none"> <li>(1) Any person who violates a term, condition or schedule of compliance contained within this permit or the Mississippi Air and Water Pollution Control Law is subject to the actions defined by the Mississippi Air and Water Pollution Control Law (Miss. Code Ann. Sections 49-17-1 through 49-17-43).</li> <li>(2) Except as provided in permit conditions on "Bypassing" and "Upsets," nothing in this permit shall be construed to relieve the coverage recipient from civil or criminal penalties for noncompliance.</li> <li>(3) It shall not be the defense of the coverage recipient in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</li> </ul>

**ACT16 (Mining) Definitions:**

## Narrative Requirements:

Condition No.	Condition
T-1	BEST MANAGEMENT PRACTICES (BMPs) means schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to prevent or reduce the discharge of pollutants to waters of the United States. BMPs also include treatment requirements, operating procedures, and practices to control site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw material storage. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-2	BUFFER ZONE, as used in this permit, means a strip of dense undisturbed perennial vegetation, either original or reestablished, that borders perennial streams and rivers, ponds and lakes and wetlands. Buffer zones are established for the purposes of slowing water runoff, enhancing water infiltration, and minimizing the risk of any potential nutrients or pollutants from leaving the upland area and reaching surface waters. Buffer zones are most effective when storm water runoff is flowing into and through the buffer zone as shallow sheet flow, rather than in concentrated form such as in channels, gullies, or wet weather conveyances. Therefore, it is critical that the design of any development include management practices, to the maximum extent practical, that will result in storm water runoff flowing into and through the buffer zone as shallow sheet flow. [11 Miss. Admin. Code Pt. 6, Ch. 1]
T-3	BYPASS means the intentional diversion of wastestreams from any portion of the coverage recipient's treatment facility. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-4	CFR means the Code of Federal Regulations. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-5	CLEAN WATER ACT (CWA) refers to the Federal Water Pollution Control Act, 33 U.S.C. Section 1251 et seq. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-6	COMMISSION means the Mississippi Commission on Environmental Quality. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-7	CONSTRUCTION EXIT is a stone-base pad designed to provide a buffer area where mud-and caked-soil can be removed from the tires of vehicles to avoid transporting it onto public roads. This practice applies anywhere traffic will be leaving a mining site and moving directly onto a paved public road or street. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-8	CONTROL MEASURE as used in this permit, refers to any Best Management Practice or other method used to prevent or reduce the discharge of pollutants to waters of the United States. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-9	EXECUTIVE DIRECTOR means the Executive Director of the Department of Environmental Quality. [11 Miss. Admin. Code Pt. 6, Ch. 1.]

**ACT16 (continued):**

## Narrative Requirements:

Condition No.	Condition
T-10	<p>EXEMPT OPERATIONS (as provided by Mississippi's Surface Mining and Reclamation Rules and Regulations) mean a mining operation with an area equal to or less than four (4) acres and is greater than one thousand three hundred and twenty (1320) feet from any other affected area if:</p> <p>(1) The operation began before July 1, 2002, and the operator notified the Department of the commencement, expansion or resumption of the operation before July 1, 2002; or</p> <p>(2) The operation commenced after July 1, 2002, and the operator notified the Department at least seven (7) calendar days before commencement or expansion of the operation. The seven day notice prior to mining requirement shall be waived and the operator may begin mining immediately after notifying the Department if:</p> <p>(A) The operator agrees, in the notification, to reclaim the mine site in accordance with the minimum standards adopted by the Commission on Environmental Quality (Commission); or</p> <p>(B) The exempted operation is conducted for Mississippi Department of Transportation (MDOT) projects or state aid road construction projects funded in whole or in part by public funds. [11 Miss. Admin. Code Pt. 8, Ch. 1.]</p>
T-11	FACILITY, ACTIVITY or OPERATIONS means any NPDES "point source" or "No Discharge" or any other facility or activity (including land or appurtenances thereto) that is subject to regulation under the NPDES program or State No Discharge Requirements. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-12	FINAL STABILIZATION means all soil disturbing activities at the site have been completed, and that a uniform perennial vegetative cover with a density of at least 70% for the area has been established or equivalent measures have been employed. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-13	INACTIVE MINING OPERATIONS means mining sites that are not being actively mined, but have an identifiable owner/operator. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-14	INFEASIBLE means not technologically possible, or not economically practicable and achievable in light of best industry practices. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-15	LOCALLY AVAILABLE means that the SWPPP is able to be produced within an hour of being requested by an inspector. [11 Miss. Admin. Code Pt. 6, Ch. 1.]

**ACT16 (continued):**

## Narrative Requirements:

Condition No.	Condition
T-16	MINE DEWATERING means any water that is impounded or that collects in the mine and is pumped, drained or otherwise removed from the mine through the efforts of the mine operator. For sand and gravel mines, this term shall also include wet pit overflows caused solely by direct rainfall and ground water seepage. However, if a mine is also used for treatment of process generated wastewater, discharges of commingled water from the facilities shall be deemed discharges of process generated wastewater. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-17	MINE PROCESS GENERATED WASTEWATER means any wastewater used in the slurry transport of mined material, wastewater generated from the dredging and/or washing of mined material, air emissions control (excluding water used for dust suppression on roads which is evaporated or absorbed by soils such that no runoff to a receiving stream occurs), or processing exclusive of mining. The term shall also include any other water that becomes commingled with such wastewater in a pit, pond, lagoon, mine or other facility used for treatment of such wastewater. The term does not include wastewater used for the suction dredging of deposits in a body of water and returned directly to the body of water without being used for other purposes or combined with other wastewater. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-18	MINING OPERATIONS include clearing, grading, excavating and other land disturbing activities. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-19	MUNICIPAL SEPARATE STORM SEWER SYSTEM (MS4) means a conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains): (i) Owned or operated by a State, city, town, borough, county, parish, district, association, or other public body (created by or pursuant to State law) having jurisdiction over disposal of sewage, industrial wastes, storm water, or other wastes, including special districts under State law such as a sewer district, flood control district or drainage district, or similar entity, or an Indian tribe or an authorized Indian tribal organization, or a designated and approved management agency under section 208 of the CWA that discharges to waters of the United States, (ii) Designed or used for collecting or conveying storm water, (iii) Which is not a combined sewer, and (iv) Which is not part of a Publicly Owned Treatment Works (POTW). [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-20	NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) means the regulations under the Clean Water Act which prohibits discharge of pollutants into waters of the United States unless a special permit is issued. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-21	OFFICE OF GEOLOGY, MINING AND RECLAMATION DIVISION means the state agency regulating all surface mines in Mississippi in accordance with the provisions of the Mississippi Surface Mining and Reclamation Law (Miss. Code Ann. Section 53-7-1 et seq.). [11 Miss. Admin. Code Pt. 8, Ch. 1.]
T-22	PERMIT BOARD means the Mississippi Environmental Quality Permit Board established pursuant to Miss. Code Ann. Section 49-17-28. [11 Miss. Admin. Code Pt. 6, Ch. 1.]

**ACT16 (continued):**

## Narrative Requirements:

Condition No.	Condition
T-23	POLLUTANT is defined at 40 CFR 122.2. A partial listing from this definition includes: dredged spoil, solid waste, sewage, garbage, sewage sludge, chemical wastes, biological materials, heat, wrecked or discarded equipment, rock, sand, sediment, silt, cellar dirt, and industrial or municipal waste. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-24	STEEP SLOPES, as used in this permit, means slopes or grades steeper than (3:1). [11 Miss. Admin. Code Pt. 6, Ch. 1]
T-25	STORM WATER means rainfall runoff, snowmelt runoff, and surface runoff. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-26	STORM WATER POLLUTION PREVENTION PLAN (SWPPP) means a plan that includes site map(s), an identification of mining-related activities that could cause pollutants in the storm water, and a description of measures or practices to control these pollutants. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-27	TOTAL MAXIMUM DAILY LOAD (TMDL) means the maximum daily amount of a pollutant that can enter a water body so that the water body will meet and continue to meet state water quality standards. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-28	UPSET means an exceptional incident in which there is unintentional and temporary noncompliance with technology based permit effluent limitations because of factors beyond the reasonable control of the coverage recipient. An upset does not include noncompliance to the extent caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-29	WATERS OF THE STATE means all waters within the jurisdiction of this State, including all streams, lakes, ponds, wetlands, impounding reservoirs, marshes, watercourses, waterways, wells, springs, irrigation systems, drainage systems, and all other bodies or accumulations of water, surface and underground, natural or artificial, situated wholly or partly within or bordering upon the State, and such coastal waters as are within the jurisdiction of the State, except lakes, ponds, or other surface waters which are wholly landlocked and privately owned, and which are not regulated under the Federal Clean Water Act (33 U.S.C. Section 1251 et seq.). [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-30	11 Miss. Admin. Code Pt. 6, Ch. 1. Means the State of Mississippi's Wastewater Regulations for National Pollutant Discharge Elimination System (NPDES) Permits, Underground Injection Control (UIC) Permits, State Permits, Water Quality Based Effluent Limitations and Water Quality Certifications. [11 Miss. Admin. Code Pt. 6, Ch. 1.]
T-31	11 MISS. ADMIN. CODE PT. 8, CH. 1. means the regulations promulgated by the Commission pursuant to the Mississippi Surface Mining and Reclamation Act (Miss. Code Ann. Section 53-7-1 et seq.). [11 Miss. Admin. Code Pt. 8, Ch. 1.]
