

**STATE OF MISSISSIPPI
AIR POLLUTION CONTROL
TITLE V PERMIT**

TO OPERATE AIR EMISSIONS EQUIPMENT

THIS CERTIFIES THAT

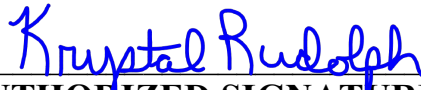

Tiffin Motorhomes, Inc. – Paint Facility
16-4 Industrial Road
Highway 25 South
Belmont, Tishomingo County, Mississippi

has been granted permission to operate air emissions equipment in accordance with emission limitations, monitoring requirements and conditions set forth herein. This permit is issued in accordance with Title V of the Federal Clean Air Act (42 U.S.C.A. § 7401 - 7671) and the provisions of the Mississippi Air and Water Pollution Control Law (Section 49-17-1 et. seq., Mississippi Code of 1972), and the regulations and standards adopted and promulgated thereunder.

Permit Issued: December 1, 2020

Effective Date: As specified herein.

MISSISSIPPI ENVIRONMENTAL QUALITY PERMIT BOARD

AUTHORIZED SIGNATURE

MISSISSIPPI DEPARTMENT OF ENVIRONMENTAL QUALITY

Expires: November 30, 2025

Permit No.: 2640-00053

TABLE OF CONTENTS

SECTION 1. GENERAL CONDITIONS.....	3
SECTION 2. EMISSION POINTS & POLLUTION CONTROL DEVICES.....	13
SECTION 3. EMISSION LIMITATIONS & STANDARDS	15
SECTION 4. COMPLIANCE SCHEDULE	18
SECTION 5. MONITORING, RECORDKEEPING & REPORTING REQUIREMENTS	19
SECTION 6. ALTERNATIVE OPERATING SCENARIOS	38
SECTION 7. TITLE VI REQUIREMENTS.....	39

APPENDIX A LIST OF ABBREVIATIONS USED IN THIS PERMIT

SECTION 1. GENERAL CONDITIONS

- 1.1 The permittee must comply with all conditions of this permit. Any permit noncompliance constitutes a violation of the Federal Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.A(6)(a).)

- 1.2 It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.A(6)(b).)

- 1.3 This permit and/or any part thereof may be modified, revoked, reopened, and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.A(6)(c).)

- 1.4 Prior to its expiration, this permit may be reopened in accordance with the provisions listed below.

(a) This permit shall be reopened and revised under any of the following circumstances:

- (1) Additional applicable requirements under the Federal Act become applicable to a major Title V source with a remaining permit term of 3 or more years. Such a reopening shall be completed no later than 18 months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended.
- (2) Additional requirements (including excess emissions requirements) become applicable to an affected source under the acid rain program. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit.
- (3) The Permit Board or EPA determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emission standards or other terms or conditions of the permit.
- (4) The Administrator or the Permit Board determines that the permit must be revised or revoked to assure compliance with the applicable requirements.

- (b) Proceedings to reopen and issue this permit shall follow the same procedures as apply to initial permit issuance and shall only affect those parts of the permit for which cause to reopen exists. Such reopening shall be made as expeditiously as practicable.
- (c) Reopenings shall not be initiated before a notice of such intent is provided to the Title V source by the DEQ at least 30 days in advance of the date that the permit is to be reopened, except that the Permit Board may provide a shorter time period in the case of an emergency.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.4.G.)

- 1.5 The permittee shall furnish to the DEQ within a reasonable time any information the DEQ may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the DEQ copies of records required to be kept by the permittee or, for information to be confidential, the permittee shall furnish such records to DEQ along with a claim of confidentiality. The permittee may furnish such records directly to the Administrator along with a claim of confidentiality.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.A(6)(e).)

- 1.6 This permit does not convey any property rights of any sort, or any exclusive privilege.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.A(6)(d).)

- 1.7 The provisions of this permit are severable. If any provision of this permit, or the application of any provision of this permit to any circumstances, is challenged or held invalid, the validity of the remaining permit provisions and/or portions thereof or their application to other persons or sets of circumstances, shall not be affected thereby.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.A(5).)

- 1.8 The permittee shall pay to the DEQ an annual permit fee. The amount of fee shall be determined each year based on the provisions of regulated pollutants for fee purposes and the fee schedule specified in the Commission on Environmental Quality's order which shall be issued in accordance with the procedure outlined in Regulation 11 Miss. Admin. Code Pt. 2, Ch. 6.

- (a) For purposes of fee assessment and collection, the permittee shall elect for actual or allowable emissions to be used in determining the annual quantity of emissions unless the Commission determines by order that the method chosen by the applicant for calculating actual emissions fails to reasonably represent actual emissions. Actual emissions shall be calculated using emission monitoring data or direct emissions measurements for the pollutant(s); mass balance calculations such as the amounts of the pollutant(s) entering and leaving process equipment and where mass balance calculations can be supported by direct measurement of process parameters, such direct measurement data shall be supplied; published emission

factors such as those relating release quantities to throughput or equipment type (e.g., air emission factors); or other approaches such as engineering calculations (e.g., estimating volatilization using published mathematical formulas) or best engineering judgments where such judgments are derived from process and/or emission data which supports the estimates of maximum actual emission.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.6.A(2).)

- (b) If the Commission determines that there is not sufficient information available on a facility's emissions, the determination of the fee shall be based upon the permitted allowable emissions until such time as an adequate determination of actual emissions is made. Such determination may be made anytime within one year of the submittal of actual emissions data by the permittee.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.6.A(2).)

- (c) If at any time within the year the Commission determines that the information submitted by the permittee on actual emissions is insufficient or incorrect, the permittee will be notified of the deficiencies and the adjusted fee schedule. Past due fees from the adjusted fee schedule will be paid on the next scheduled quarterly payment time.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.6.D(2).)

- (d) The fee shall be due September 1 of each year. By July 1 of each year, the permittee shall submit an inventory of emissions for the previous year on which the fee is to be assessed. The permittee may elect a quarterly payment method of four (4) equal payments; notification of the election of quarterly payments must be made to the DEQ by the first payment date of September 1. The permittee shall be liable for penalty as prescribed by State Law for failure to pay the fee or quarterly portion thereof by the date due.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.6.D.)

- (e) If in disagreement with the calculation or applicability of the Title V permit fee, the permittee may petition the Commission in writing for a hearing in accordance with State Law. Any disputed portion of the fee for which a hearing has been requested will not incur any penalty or interest from and after the receipt by the Commission of the hearing petition.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.6.C.)

- 1.9 No permit revision shall be required under any approved economic incentives, marketable permits, emissions trading and other similar programs or processes for changes that are provided for in this permit.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.A(8).)

- 1.10 Any document required by this permit to be submitted to the DEQ shall contain a certification by a responsible official that states that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.2.E.)

- 1.11 The permittee shall allow the DEQ, or an authorized representative, upon the presentation of credentials and other documents as may be required by law, to perform the following:
- (a) Enter upon the permittee's premises where a Title V source is located or emissions-related activity is conducted, or where records must be kept under the conditions of this permit;
 - (b) Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;
 - (c) Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the permit; and
 - (d) As authorized by the Federal Act, sample or monitor, at reasonable times, substances or parameters for the purpose of assuring compliance with the permit or applicable requirements.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.C(2).)

- 1.12 Except as otherwise specified or limited herein, the permittee shall have necessary sampling ports and ease of accessibility for any new air pollution control equipment, obtained after May 8, 1970, and vented to the atmosphere.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 1.3.I(1).)

- 1.13 Except as otherwise specified or limited herein, the permittee shall provide the necessary sampling ports and ease of accessibility when deemed necessary by the Permit Board for air pollution control equipment that was in existence prior to May 8, 1970.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 1.3.I(2).)

- 1.14 Compliance with the conditions of this permit shall be deemed compliance with any applicable requirements as of the date of permit issuance where such applicable requirements are included and are specifically identified in the permit or where the permit contains a determination, or summary thereof, by the Permit Board that requirements specifically identified previously are not applicable to the source.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.F(1).)

1.15 Nothing in this permit shall alter or affect the following:

- (a) The provisions of Section 303 of the Federal Act (emergency orders), including the authority of the Administrator under that section;
- (b) The liability of an owner or operator of a source for any violation of applicable requirements prior to or at the time of permit issuance;
- (c) The applicable requirements of the acid rain program, consistent with Section 408(a) of the Federal Act.
- (d) The ability of EPA to obtain information from a source pursuant to Section 114 of the Federal Act.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.F(2).)

1.16 The permittee shall comply with the requirement to register a Risk Management Plan if permittee's facility is required pursuant to Section 112(r) of the Act to register such a plan.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.H.)

1.17 Expiration of this permit terminates the permittee's right to operate unless a timely and complete renewal application has been submitted. A timely application is one which is submitted at least six (6) months prior to expiration of the Title V permit. If the permittee submits a timely and complete application, the failure to have a Title V permit is not a violation of regulations until the Permit Board takes final action on the permit application. This protection shall cease to apply if, subsequent to the completeness determination, the permittee fails to submit by the deadline specified in writing by the DEQ any additional information identified as being needed to process the application.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.4.C(2)., R. 6.4.B., and R. 6.2.A(1)(c).)

1.18 The permittee is authorized to make changes within their facility without requiring a permit revision (ref: Section 502(b)(10) of the Act) if:

- (a) The changes are not modifications under any provision of Title I of the Act;
- (b) The changes do not exceed the emissions allowable under this permit;
- (c) The permittee provides the Administrator and the Department with written notification in advance of the proposed changes (at least seven (7) days, or such other time frame as provided in other regulations for emergencies) and the notification includes:

- (1) A brief description of the change(s),
 - (2) The date on which the change will occur,
 - (3) Any change in emissions, and
 - (4) Any permit term or condition that is no longer applicable as a result of the change;
- (d) The permit shield shall not apply to any Section 502(b)(10) change.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.4.F(1).)

- 1.19 Should the Executive Director of the Mississippi Department of Environmental Quality declare an Air Pollution Emergency Episode, the permittee will be required to operate in accordance with the permittee's previously approved Emissions Reduction Schedule or, in the absence of an approved schedule, with the appropriate requirements specified in 11 Miss. Admin. Code Pt. 2, Ch. 3., "Regulations for the Prevention of Air Pollution Emergency Episodes" for the level of emergency declared.

(Ref.: 11 Miss. Admin. Code Pt. 2, Ch. 3.)

- 1.20 Except as otherwise provided herein, a modification of the facility may require a Permit to Construct in accordance with the provisions of Regulations 11 Miss. Admin. Code Pt. 2, Ch. 2., "Permit Regulations for the Construction and/or Operation of Air Emissions Equipment", and may require modification of this permit in accordance with Regulations 11 Miss. Admin. Code Pt. 2, Ch. 6., "Air Emissions Operating Permit Regulations for the Purposes of Title V of the Federal Clean Air Act".

"Modification" is defined as [a]ny physical change in or change in the method of operation of a facility which increases the actual emissions or the potential uncontrolled emissions of any air pollutant subject to regulation under the Federal Act emitted into the atmosphere by that facility or which results in the emission of any air pollutant subject to regulation under the Federal Act into the atmosphere not previously emitted. A physical change or change in the method of operation shall not include:

- (a) Routine maintenance, repair, and replacement;
- (b) Use of an alternative fuel or raw material by reason of an order under Sections 2 (a) and (b) of the Federal Energy Supply and Environmental Coordination Act of 1974 (or any superseding legislation) or by reason of a natural gas curtailment plan pursuant to the Federal Power Act;
- (c) Use of an alternative fuel by reason of an order or rule under Section 125 of the Federal Act;

- (d) Use of an alternative fuel or raw material by a stationary source which:
 - (1) The source was capable of accommodating before January 6, 1975, unless such change would be prohibited under any federally enforceable permit condition which was established after January 6, 1975, pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51 – Subpart I, or 40 CFR 51.166; or
 - (2) The source is approved to use under any permit issued under 40 CFR 52.21 or under regulations approved pursuant to 40 CFR Part 51 – Subpart I, or 40 CFR 51.166;
- (e) An increase in the hours of operation or in the production rate unless such change would be prohibited under any federally enforceable permit condition which was established after January 6, 1975, pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR Part 51 – Subpart I or 40 CFR 51.166; or
- (f) Any change in ownership of the stationary source.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.1.C(15).)

- 1.21 Any change in ownership or operational control must be approved by the Permit Board.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.4.D(4).)

- 1.22 This permit is a Federally approved operating permit under Title V of the Federal Clean Air Act as amended in 1990. All terms and conditions, including any designed to limit the source's potential to emit, are enforceable by the Administrator and citizens under the Federal Act as well as the Commission.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.B(1).)

- 1.23 Except as otherwise specified or limited herein, the open burning of residential, commercial, institutional, or industrial solid waste, is prohibited. This prohibition does not apply to infrequent burning of agricultural wastes in the field, silvicultural wastes for forest management purposes, land-clearing debris, debris from emergency clean-up operations, and ordnance. Open burning of land-clearing debris must not use starter or auxiliary fuels which cause excessive smoke (rubber tires, plastics, etc.); must not be performed if prohibited by local ordinances; must not cause a traffic hazard; must not take place where there is a High Fire Danger Alert declared by the Mississippi Forestry Commission or Emergency Air Pollution Episode Alert imposed by the Executive Director and must meet the following buffer zones.

- (a) Open burning without a forced-draft air system must not occur within 500 yards of an occupied dwelling.

- (b) Open burning utilizing a forced-draft air system on all fires to improve the combustion rate and reduce smoke may be done within 500 yards of but not within 50 yards of an occupied dwelling.
- (c) Burning must not occur within 500 yards of commercial airport property, private airfields, or marked off-runway aircraft approach corridors unless written approval to conduct burning is secured from the proper airport authority, owner or operator.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 1.3.G.)

1.24 Except as otherwise specified herein, the permittee shall be subject to the following provision with respect to emergencies:

- (a) Except as otherwise specified herein, an "emergency" means any situation arising from sudden and reasonably unforeseeable events beyond the control of the source, including acts of God, which situation requires immediate corrective action to restore normal operation, and that causes the source to exceed a technology-based emission limitation under the permit, due to unavoidable increases in emissions attributable to the emergency. An emergency shall not include noncompliance to the extent caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operator error.
- (b) An emergency constitutes an affirmative defense to an action brought for noncompliance with such technology-based emission limitations if the conditions specified in (c) following are met.
- (c) The affirmative defense of emergency shall be demonstrated through properly signed contemporaneous operating logs, or other relevant evidence that include information as follows:
 - (1) An emergency occurred and that the permittee can identify the cause(s) of the emergency;
 - (2) The permitted facility was at the time being properly operated;
 - (3) During the period of the emergency the permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and
 - (4) The permittee submitted notice of the emergency to the DEQ within 2 working days of the time when emission limitations were exceeded due to the emergency. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.
- (d) In any enforcement proceeding, the permittee seeking to establish the occurrence

of an emergency has the burden of proof.

- (e) This provision is in addition to any emergency or upset provision contained in any applicable requirement specified elsewhere herein.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.G.)

1.25 Except as otherwise specified herein, the permittee shall be subject to the following provisions with respect to upsets, startups, and shutdowns.

- (a) Upsets (as defined in 11 Miss. Admin. Code Pt. 2, R. 1.2.)

- (1) For an upset, the Commission may pursue an enforcement action for noncompliance with an emission standard or other requirement of an applicable rule, regulation, or permit. In determining whether to pursue enforcement action, and/or the appropriate enforcement action to take, the Commission may consider whether the source has demonstrated through properly signed contemporaneous operating logs or other relevant evidence the following:
 - (i) An upset occurred and that the source can identify the cause(s) of the upset;
 - (ii) The source was at the time being properly operated;
 - (iii) During the upset the source took all reasonable steps to minimize levels of emissions that exceeded the emission standard or other requirement of an applicable rule, regulation, or permit;
 - (iv) That within 5 working days of the time the upset began, the source submitted a written report to the Department describing the upset, the steps taken to mitigate excess emissions or any other noncompliance, and the corrective actions taken and;
 - (v) That as soon as practicable but no later than 24 hours of becoming aware of an upset that caused an immediate adverse impact to human health or the environment beyond the source boundary or caused a general nuisance to the public, the source provided notification to the Department.
- (2) In any enforcement proceeding by the Commission, the source seeking to establish the occurrence of an upset has the burden of proof.
- (3) This provision is in addition to any upset provision contained in any applicable requirement.

- (4) These upset provisions apply only to enforcement actions by the Commission and are not intended to prohibit EPA or third party enforcement actions.
- (b) Startups and Shutdowns (as defined in 11 Miss. Admin. Code Pt. 2, R. 1.2.)
 - (1) Startups and shutdowns are part of normal source operation. Emission limitations apply during startups and shutdowns unless source specific emission limitations or work practice standards for startups and shutdowns are defined by an applicable rule, regulation, or permit.
 - (2) Where the source is unable to comply with existing emission limitations established under the State Implementation Plan (SIP) and defined in this regulation, 11 Mississippi Administrative Code, Part 2, Chapter 1, the Department will consider establishing source specific emission limitations or work practice standards for startups and shutdowns. Source specific emission limitations or work practice standards established for startups and shutdowns are subject to the requirements prescribed in 11 Miss. Admin. Code Pt. 2, R. 1.10.B(2)(a) through (e).
 - (3) Where an upset as defined in Rule 1.2 occurs during startup or shutdown, see the upset requirements above.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 1.10.)

- 1.26 The permittee shall comply with all applicable standards for demolition and renovation activities pursuant to the requirements of 40 CFR Part 61, Subpart M, as adopted by reference in Regulation 11 Miss Admin. Code Pt. 2, R. 1.8. The permittee shall not be required to obtain a modification of this permit in order to perform the referenced activities.

(Ref.: 11 Miss Admin. Code Pt. 2, R. 1.8.)

SECTION 2. EMISSION POINTS & POLLUTION CONTROL DEVICES

Emission Point	Description
AA-100	Facility-Wide (Tiffin Motorhomes, Inc. – Paint Facility)
AA-001	Paint Booth #1 (PB1) (equipped with a 6.4 MMBTU/hr natural gas-fired burner)
AA-002	Paint Booth #2 (PB2) (equipped with a 6.4 MMBTU/hr natural gas-fired burner)
AA-003	Paint Booth #3 (PB3) (equipped with a 6.4 MMBTU/hr natural gas-fired burner)
AA-004	Paint Booth #4 (PB4) (equipped with a 6.4 MMBTU/hr natural gas-fired burner)
AA-005	Paint Booth #5 (PB5) (equipped with a 6.4 MMBTU/hr natural gas-fired burner)
AA-006	Paint Booth #6 (PB6) (equipped with a 6.4 MMBTU/hr natural gas-fired burner)
AA-007	Paint Booth #7 (PB7) (equipped with a 6.4 MMBTU/hr natural gas-fired burner)
AA-008	Paint Booth #8 (PB8) (equipped with a 6.4 MMBTU/hr natural gas-fired burner)
AA-009	Paint Booth #9 (PB9)
AA-010	Paint Booth #10 (PB10)
AA-011	Paint Booth #11 (PB11)
AA-012	Paint Booth #12 (PB12)
AA-013	Paint Booth #13 (PB13) (equipped with a 6.4 MMBTU/hr natural gas-fired burner)
AA-014	Paint Booth #14 (PB14) (equipped with a 2.8 MMBTU/hr natural gas-fired burner)
AA-015	Paint Booth #15 (PB15) (equipped with a 6.4 MMBTU/hr natural gas-fired burner)
AA-016	Small Parts Paint Booth (SP1) (equipped with a 1.6 MMBTU/hr natural gas-fired burner)
AA-017	Paint [Repair] Booth #17 (PB17) (equipped with a 2.8 MMBTU/hr natural gas-fired burner)
AA-018	Motorhome Preparation (MP1) (including, but not limited to, sanding; equipped with a cyclone)
AA-019	10,000 Gallon Gasoline Storage Tank
AA-020	10,000 Gallon Diesel Storage Tank
AA-021	Drying Booth #1 (DR1) (equipped with a 1.6 MMBTU/hr natural gas-fired burner)

Emission Point	Description
AA-022	Drying Booth #2 (DR2) (equipped with a 1.6 MMBTU/hr natural gas-fired burner)
AA-024	1,000 Gallon Liquefied Petroleum Gas Tank
AA-025	Paint [Repair] Booth #18 (PB18)
AA-026	Paint [Repair] Booth #19 (PB19)
AA-027	Drying Booth #3 (DR3) (equipped with a 2.7 MMBTU/hr natural gas-fired burner)

SECTION 3. EMISSION LIMITATIONS & STANDARDS

A. FACILITY-WIDE EMISSION LIMITATIONS & STANDARDS

3.A.1 Except as otherwise specified or limited herein, the permittee shall not cause, permit, or allow the emission of smoke from a point source into the open air from any manufacturing, industrial, commercial or waste disposal process, which exceeds forty (40) percent opacity subject to the exceptions provided in (a) and (b) as follows:

- (a) Start-up operations may produce emissions, which exceed 40% opacity for up to fifteen (15) minutes per start-up in any one (1) hour and not to exceed three (3) start-ups per stack in any twenty-four (24) hour period.
- (b) Emissions resulting from soot blowing operations shall be permitted provided such emissions do not exceed sixty (60) percent opacity, and provided further that the aggregate duration of such emissions during any twenty-four (24) hour period does not exceed ten (10) minutes per billion BTU gross heating value of fuel in any one hour.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 1.3.A.)

3.A.2 Except as otherwise specified or limited herein, the permittee shall not cause, allow, or permit the discharge into the ambient air from any point source or emissions, any air contaminant of such opacity as to obscure an observer's view to a degree in excess of 40% opacity, equivalent to that provided in Condition 3.A.1. This shall not apply to vision obscuration caused by uncombined water droplets.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 1.3.B.)

B. EMISSION POINT SPECIFIC EMISSION LIMITATIONS & STANDARDS

Emission Point(s)	Applicable Requirement	Condition Number	Pollutant/Parameter	Limit / Standard
AA-100	11 Miss. Admin. Code Pt. 2, R. 2.2.B(10)., as established in the Permit to Construct issued August 2, 2004 (PSD Avoidance Limit)	3.B.1	VOCs	249.0 tpy (Rolling 12-Month Period)
AA-001 through AA-017 AA-025 AA-026	40 CFR Part 63, Subpart PPPP- National Emission Standards for Hazardous Air Pollutants for Surface Coating of Plastic Parts 40 CFR 63.4481(a), 63.4501	3.B.2	HAPs	General Applicability
	40 CFR 63.4490(a)(4), Subpart PPPP	3.B.3	Organic HAPs	1.34 kg (1.34 lbs) per kg (lb) of coating solids

3.B.1 For Emission Point AA-100 (Facility-Wide), the permittee shall limit volatile organic compound (VOC) emissions to no more than 249.0 tons per year (tpy) based on a rolling 12-month period.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.2.B(10)., as established in the Permit to Construct issued August 2, 2004.)

3.B.2 For Emission Points AA-001 through AA-017, AA-025, and AA-026, the permittee is subject to and shall comply with 40 CFR Part 63, Subpart PPPP – National Emission Standards for Hazardous Air Pollutants for Surface Coating of Plastic Parts and Products and the applicable requirements in 40 CFR Part 63, Subpart A – General Provisions, as specified in Table 2 of Subpart PPPP.

(Ref.: 40 CFR 63.4481(a)(5) and (b), Subpart PPPP)

3.B.3 For Emission Points AA-001 through AA-017, AA-025 and AA-026, the permittee shall limit organic hazardous air pollutant (HAP) emissions to no more than 1.34 kilograms (1.34 pounds) per kilogram (pound) of coating solids used during each 12-month compliance period.

(Ref.: 40 CFR 63.4490(a)(4) and 63.4501, Subpart PPPP)

C. INSIGNIFICANT AND TRIVIAL ACTIVITY EMISSION LIMITATIONS & STANDARDS

Applicable Requirement	Condition Number	Pollutant/Parameter	Limit / Standard
11 Miss. Admin. Code Pt. 2, R. 1.3.D(1)(a).	3.C.1	PM	0.6 lbs. / MMBTU
11 Miss. Admin. Code Pt. 2, R. 1.4.A(1).	3.C.2	SO ₂	4.8 lbs. / MMBTU
11 Miss. Admin. Code Pt. 2, R. 1.3.F(1).	3.C.3	PM	$E = 4.1 \cdot (p^{0.67})$

- 3.C.1 The maximum permissible emission of ash and/or particulate matter from fossil fuel burning installations of less than 10 million BTU per hour heat input shall not exceed 0.6 pounds per million BTU per hour heat input.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 1.3.D(1)(a).)

- 3.C.2 The maximum discharge of sulfur oxides from any fuel burning installation in which the fuel is burned primarily to produce heat or power by indirect heat transfer shall not exceed 4.8 pounds (measured as sulfur dioxide or SO₂) per million BTU heat input.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 1.4.A(1).)

- 3.C.3 The maximum permissible emission of particulate matter shall not exceed an emission rate as determined by the relationship:

$$E = 4.1 \cdot (p^{0.67})$$

where **E** is the emission rate in pounds per hour and **p** is the process weight input rate in tons per hour.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 1.3.F(1).)

SECTION 4. COMPLIANCE SCHEDULE

- 4.1 Unless otherwise specified herein, the permittee shall be in compliance with all requirements contained herein upon issuance of this permit.
- 4.2 Except as otherwise specified herein, the permittee shall submit to the Permit Board and to the Administrator of EPA Region IV a certification of compliance with permit terms and conditions, including emission limitations, standards, or work practices, by January 31 for the preceding calendar year. Each compliance certification shall include the following:
- (a) The identification of each term or condition of the permit that is the basis of the certification;
 - (b) The compliance status;
 - (c) Whether compliance was continuous or intermittent;
 - (d) The method(s) used for determining the compliance status of the source, currently and over the applicable reporting period;
 - (e) Such other facts as may be specified as pertinent in specific conditions elsewhere in this permit.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.C(5)(a), (c), & (d).)

SECTION 5. MONITORING, RECORDKEEPING & REPORTING REQUIREMENTS

A. General Monitoring, Recordkeeping and Reporting Requirements

- 5.A.1 The permittee shall install, maintain, and operate equipment and/or institute procedures as necessary to perform the monitoring and recordkeeping specified below.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.A(3).)

- 5.A.2 In addition to the recordkeeping specified below, the permittee shall include with all records of required monitoring information the following:

- (a) The date, place as defined in the permit, and time of sampling or measurements;
- (b) The date(s) analyses were performed;
- (c) The company or entity that performed the analyses;
- (d) The analytical techniques or methods used;
- (e) The results of such analyses; and
- (f) The operating conditions existing at the time of sampling or measurement.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.A(3)(b)(1).)

- 5.A.3 Except where a longer duration is specified in an applicable requirement, the permittee shall retain records of all required monitoring data and support information for a period of at least five (5) years from the date of the monitoring sample, measurement, report, or application. Support information includes all calibration and maintenance records, all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by the permit.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.A(3)(b)(2).)

- 5.A.4 Except as otherwise specified herein, the permittee shall submit reports of any required monitoring by July 31 and January 31 for the preceding six-month period. All instances of deviations from permit requirements must be clearly identified in such reports and all required reports must be certified by a responsible official consistent with 11 Miss. Admin. Code Pt. 2, R. 6.2.E.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.A(3)(c)(1).)

- 5.A.5 Except as otherwise specified herein, the permittee shall report all deviations from permit requirements, including those attributable to upsets, the probable cause of such deviations, and any corrective actions or preventive measures taken. Said report shall be made within five (5) working days of the time the deviation began.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.A(3)(c)(2).)

- 5.A.6 Except as otherwise specified herein, the permittee shall perform emissions sampling and analysis in accordance with EPA Test Methods and with any continuous emission monitoring requirements, if applicable. All test methods shall be those versions or their equivalents approved by the DEQ and the EPA.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.A(3).)

- 5.A.7 The permittee shall maintain records of any alterations, additions, or changes in equipment or operation.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.A(3).)

B. SPECIFIC MONITORING AND RECORDKEEPING REQUIREMENTS

Emission Point(s)	Applicable Requirement	Condition Number	Pollutant/Parameter Monitored	Monitoring/Recordkeeping Requirement
AA-100	11 Miss. Admin. Code Pt. 2, R. 6.3.A(3)(a)(2).	5.B.1	VOCs	Monitor and Maintain Records
AA-001 through AA-017 AA-025 AA-026	40 CFR 63.4491(a), (b) and 63.500(a)(1), Subpart PPPP	5.B.2	Organic HAPs	Compliant Material Option and Emission Rate without Add-on Controls Option
	40 CFR 63.4530(a), (b), (c)(1)-(3), (d), (e), (f), (g), and (h), Subpart PPPP	5.B.3	Records	Notifications, Manufacturer Data, Compliance Period, Nature and Volume of Coatings, Mass and Volume Fractions of Organic HAP, Organic HAP Allowance, and Deviations
	40 CFR 63.4531, Subpart PPPP	5.B.4		Form and Duration of Records to be kept
	40 CFR 63.4541, Subpart PPPP	5.B.5		Compliant Material Option Compliance Procedures
	40 CFR 63.4551, Subpart PPPP	5.B.6		Emission Rate without Add-on Controls Option Compliance Procedure
	40 CFR 63.4542 and 63.4552, Subpart PPPP	5.B.7		Demonstration of Continuous Compliance for Compliant Material Option and/or Emission Rate without Add-on Controls Option

5.B.1 For Emission Point AA-100 (Facility-Wide), the permittee shall monitor and maintain records on the total mass (in tons) of volatile organic compound (VOC) emissions from all sources that can reasonably emit the pollutant [including (but not limited to) paint booths, paint preparation, fuel usage, and storage tanks] based on a rolling 12-month period.

To demonstrate compliance with the specified VOC limitation in Condition 3.B.1, the permittee may utilize data supplied by the manufacturer or supplier, or analysis of VOC content by EPA Test Method 24 found in Appendix A of 40 CFR Part 60, or an alternate EPA-approved test method.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.A(3)(a)(2).)

5.B.2 For Emission Points AA-001 through AA-017, AA-025, and AA-026, the permittee shall include all coatings (as defined in 40 CFR 63.4581, Subpart PPPP), thinners and/or other additives, and cleaning materials used in the affected source when determining whether the organic HAP emission rate is equal to or less than the emission limit in Condition

3.B.3. To make this determination, the permittee shall use at least one of the compliance options listed in paragraphs (a) or (b) of this condition. The permittee may apply either of the compliance options to an individual coating operation, to multiple coating operations as a group, or to the entire affected source. The permittee may use different compliance options for different coating operations, or at different times of the same coating operation.

The permittee may employ different compliance options when different coatings are applied to the same part, or when the same coating is applied to different parts. However, the permittee may not use different compliance options at the same time on the same coating operation. If the permittee switches between compliance options for any coating operation or group of coating operations, the permittee shall document this switch as required by Condition 5.B.3(c), and the permittee shall report it in the next semi-annual compliance report as required in Condition 5.C.2.

- (a) *Compliant Material Option:* Demonstrate that the organic HAP content of each coating used in the coating operation(s) is less than or equal to the emission limit in Condition 3.B.3, and that each thinner and/or other additive, and cleaning material used contains no organic HAPs. The permittee shall meet all the requirements of Conditions 5.B.5 and 5.B.7 to demonstrate compliance with the noted emission limit using this option.
- (b) *Emission Rate without Add-on Controls Option:* Demonstrate that, based on the coatings, thinners and/or other additives, and cleaning materials used in the coating operation(s), the organic HAP emission rate for the coating operation(s) is less than or equal to the emission limit in Condition 3.B.3, calculated as a rolling 12-month emission rate and determined on a monthly basis. The permittee shall meet all the requirements of Conditions 5.B.6 and 5.B.7 to demonstrate compliance with the emission limit using this option.

Any coating operation(s) for which the permittee uses the *Compliant Material Option* or the *Emission Rate without Add-on Controls Option*, as specified above, must be in compliance with the emission limit in Condition 3.B.3 at all times.

(Ref.: 40 CFR 63.4491(a), (b) and 63.500(a)(1), Subpart PPPP)

5.B.3 For Emission Points AA-001 through AA-017, AA-025, and AA-026, the permittee shall collect and keep records of the data and information as specified in this condition. Failure to collect and keep these records is a deviation from the applicable standard.

- (a) A copy of each notification and report that the permittee submitted to comply with this subpart, and the documentation supporting each notification and report. The permittee shall also keep records of any data used in the calculation of the facility-specific emission limit for each 12-month compliance period included in the semi-annual compliance reports.

- (b) A current copy of information provided by materials manufacturers or suppliers, such as manufacturer's formulation data, or test data used to determine the mass fraction of organic HAP and density for each coating, thinner and/or other additive, and cleaning material, and the mass fraction of coating solids for each coating. If the permittee conducted testing to determine mass fraction of organic HAP, density, or mass fraction of coating solids, the permittee shall keep a copy of the complete test report. If the permittee uses information provided by the manufacturer or supplier of the material that was based on testing, the permittee shall keep the summary sheet of results provided by the manufacturer or supplier. The permittee is not required to obtain the test report or other supporting documentation from the manufacturer or supplier.
- (c) For each compliance period, the records specified in paragraphs (c)(1) – (3) of this condition.
 - (1) A record of the coating operations on which the permittee used each compliance option and the time periods (beginning and ending dates and times) for each option the permittee used.
 - (2) For the *Compliant Material Option*, a record of the calculation of the organic HAP content for each coating, using Equation 1 in Condition 5.B.5(c).
 - (3) For the *Emission Rate Without Add-on Controls Option*, a record of the calculation of the total mass of organic HAP emissions for the coatings, thinners and/or other additives, and cleaning materials used each month using Equations 1, 1A, 1B, 1C, and 2 in Condition 5.B.6(e) and (f), and (if applicable) the calculation used to determine the mass of organic HAPs in waste materials in accordance with Condition 5.B.6(e)(4); the calculation of the total mass of coating solids used each month using Equation 2 in Condition 5.B.6(f); and the calculation of each 12-month organic HAP emission rate using Equation 3 in Condition 5.B.6(f).
- (d) A record of the name and mass of each coating, thinner and/or other additive, and cleaning material used during each compliance period. If the permittee is using the *Compliant Material Option* for all coatings at the source, the permittee may maintain purchase records for each material used rather than a record of the mass used.
- (e) A record of the mass fraction of organic HAP for each coating, thinner and/or additive, and cleaning material used during each compliance period unless the material is tracked by weight.
- (f) A record of the mass fraction of coating solids for each coating used during each compliance period.

- (g) If the permittee uses an allowance in Equation 1 in Condition 5.B.6 for organic HAPs contained in waste materials sent to or designated for shipment to a treatment, storage, and disposal facility (TSDF) in accordance with Condition 5.B.6(e)(4), the permittee shall keep records of the information specified in paragraphs (g)(1) through (3) of this condition.
- (1) The name and address of each TSDF to which the permittee sent waste materials for which the permittee uses an allowance in Equation 1 in Condition 5.B.6; a statement of which subparts under 40 CFR Parts 262, 264, 265, and 266 apply to the permittee; and the date of each shipment.
 - (2) Identification of the coating operations producing waste materials included in each shipment and the month or months in which the permittee used the allowance for these materials in Equation 1 in Condition 5.B.6.
 - (3) The methodology used in accordance with Condition 5.B.6(e)(4) to determine the total amount of waste materials sent to or the amount collected, stored, and designated for transport to a TSDF each month, and the methodology to determine the mass of organic HAPs contained in these waste materials. This must include the sources for all data used in the determination, methods used to generate the data, frequency of testing or monitoring, and supporting calculations and documentation, including the waste manifest for each shipment.
- (h) The permittee shall keep records of the date, time, and duration of each deviation.

(Ref.: 40 CFR 63.4530(a), (b), (c)(1)-(3), (d), (e), (f), (g), and (h), Subpart PPPP)

5.B.4 For Emission Points AA-001 through AA-017, AA-025 and AA-026, the permittee shall maintain records in the following form and duration:

- (a) The permittee's records shall be in a form suitable and readily available for expeditious review. Where appropriate, the records may be maintained as electronic spreadsheets or as a database.
- (b) The permittee shall keep each record for five (5) years following the date of each occurrence, measurement, maintenance, corrective action, report, or record.
- (c) The permittee shall keep each record on-site for at least two (2) years after the date of each occurrence, measurement, maintenance, corrective action, report, or record. The permittee may keep the records off-site for the remaining three (3) years.

(Ref.: 40 CFR 63.4531, Subpart PPPP)

- 5.B.5 For Emission Points AA-001 through AA-017, AA-025, and AA-026, the permittee may use the *Compliant Material Option* for any individual coating operation, for any group of coating operations in the affected source, or for all the coating operations in the affected source. The permittee must use the *Emission Rate without Add-on Controls Option* (as specified in Condition 5.B.6) for any coating operation in the affected source for which the permittee does not use the option specified in this Condition. The permittee must meet all the requirements of this condition.

Use the procedures in this condition on each coating, thinner and/or other additive, and cleaning material in the condition it is in when it is received from its manufacturer or supplier and prior to any alteration. The permittee does not need to redetermine the organic HAP content of coatings, thinners and/or other additives, and cleaning materials that are reclaimed on-site (or reclaimed off-site if the permittee has documentation showing that the permittee received back the exact same materials that were sent off-site) and reused in the coating operation for which the permittee uses the *Compliant Material Option*, provided these materials in their condition as received were demonstrated to comply with the *Compliant Material Option*.

- (a) *Determine the mass fraction of organic HAP for each material used.* The permittee must determine the mass fraction of organic HAP for each coating, thinner and/or other additive, and cleaning material used during the compliance period by using one of the options in paragraphs (a)(1) through (5) of this Condition.
- (1) *Method 311 (Appendix A in 40 CFR Part 63).* The permittee may use Method 311 for determining the mass fraction of organic HAP. The permittee shall use the procedures specified in paragraphs (a)(1)(i) and (ii) of this condition when performing a Method 311 test.
- (i) Count each organic HAP noted in Table 5 of Subpart PPPP that is measured to be present at 0.1 percent by mass or more and at 1.0 percent by mass or more for other compounds. Express the mass fraction of each organic HAP counted as a value truncated to four places after the decimal point (*e.g.* 0.3791).
- (ii) Calculate the total mass fraction of organic HAP in the test material by adding up the individual organic HAP mass fractions and truncating the result to three places after the decimal point (*e.g.* 0.763).
- (2) *Method 24 (Appendix A in 40 CFR Part 60).* For coatings, the permittee may use Method 24 to determine the mass fraction of nonaqueous volatile matter and use that value as a substitute for mass fraction of organic HAPs. For reactive adhesives in which some of the HAPs react to form solids and are not emitted to the atmosphere, the permittee may use the alternative method contained in appendix A to this subpart, rather than Method 24. The permittee may use the volatile fraction that is emitted, as measured by the alternative

method in Appendix A of Subpart PPPP, as a substitute for the mass fraction of organic HAPs.

- (3) *Alternative method.* The permittee may use an alternative test method for determining the mass fraction of organic HAP once the Administrator has approved it. The permittee must follow the procedure in 40 CFR 63.7(f), Subpart A to submit an alternative test method for approval.
- (4) *Information from the manufacturer or supplier of the material.* The permittee may rely on information other than that generated by the test methods specified in paragraphs (a)(1) through (3) of this section (such as manufacturer's formulation data) if it represents each organic HAP noted in Table 5 of Subpart PPPP that is present at 0.1 percent by mass or more and at 1.0 percent by mass or more for other compounds.

For reactive adhesives in which some of the HAPs react to form solids and are not emitted to the atmosphere, the permittee may rely on manufacturer's data that expressly states the organic HAPs or volatile matter mass fraction emitted. If there is a disagreement between such information and results of a test conducted according to paragraphs (a)(1) through (3) of this condition, then the test method results will take precedence unless (after consultation) the permittee demonstrates to the satisfaction of the enforcement agency that the formulation data are correct.

- (5) *Solvent blends.* Solvent blends may be listed as single components for some materials in data provided by manufacturers or suppliers. Solvent blends may contain organic HAPs, which must be counted toward the total organic HAP mass fraction of the materials. When test data and manufacturer's data for solvent blends are not available, the permittee may use the default values for the mass fraction of organic HAP in these solvent blends listed in Table 3 or 4 of Subpart PPPP.

If the permittee uses the tables, the permittee must use the values in Table 3 for all solvent blends that match Table 3 entries and in accordance with the instructions in Table 3. The permittee may also use Table 4 only if the solvent blends in the materials the permittee uses do not match any of the solvent blends in Table 3, and the permittee knows only whether the blend is aliphatic or aromatic. However, if the results of a Method 311 (found in Appendix A of 40 CFR Part 63) test indicate higher values than those listed in Table 3 or 4 of Subpart PPPP, the Method 311 results will take precedence unless (after consultation) the permittee demonstrates to the satisfaction of the enforcement agency that the formulation data are correct.

- (b) *Determine the mass fraction of coating solids for each coating.* The permittee must determine the mass fraction of coating solids [kg (lb) of coating solids per kg (lb) of coating] for each coating used during the compliance period by a test, by

information provided by the manufacturer or supplier of the material, or by calculation, as specified in paragraphs (b)(1) through (3) of this condition:

- (1) *Method 24 (Appendix A in 40 CFR Part 60).* Use Method 24 for determining the mass fraction of coating solids. For reactive adhesives in which some of the liquid fraction reacts to form solids, the permittee may use the alternative method contained in Appendix A of Subpart PPPP, rather than Method 24, to determine the mass fraction of coating solids.
 - (2) *Alternative method.* The permittee may use an alternative test method for determining the solids content of each coating once the Administrator has approved it. The permittee must follow the procedure in 40 CFR 63.7(f), Subpart A to submit an alternative test method for approval.
 - (3) *Information from the manufacturer or supplier of the material.* The permittee may obtain the mass fraction of coating solids for each coating from the manufacturer or supplier. If there is disagreement between such information and the test method results, then the test method results will take precedence unless, after consultation, the permittee demonstrates to the satisfaction of the enforcement agency that the formulation data are correct.
- (c) *Calculate the organic HAP content of each coating.* Calculate the organic HAP content [in kg (lb) of organic HAPs emitted per kg (lb) of coating solids used] of each coating used during the compliance period using Equation 1 of this condition:

$$H_c = \frac{W_c}{S_c} \quad (\text{Eq. 1})$$

where:

H_c = organic HAP content of the coating: kg (lb) of organic HAPs emitted per kg (lb) of coating solids used.

W_c = mass fraction of organic HAP in the coating: kg (lb) of organic HAPs per kg (lb) of coating, determined according to paragraph (a) of this condition.

S_c = mass fraction of coating solids: kg (lb) of coating solids per kg (lb) of coating, determined according to paragraph (b) of this condition.

(Ref.: 40 CFR 63.4541, Subpart PPPP)

- 5.B.6 For Emission Points AA-001 through AA-017, AA-025, and AA-026, the permittee may use the *Emission Rate without Add-on Controls Option* for any individual coating operation, for any group of coating operations in the affected source, or for all the coating operations in the affected source. The permittee must use either the option specified in

this Condition or the *Compliant Material Option*, which is specified in Condition 5.B.5, for any coating operation in the affected source. The permittee must meet all the requirements of this Condition. When calculating the organic HAP emission rate according to this Condition, do not include any coatings, thinners and/or other additives, or cleaning materials used on coating operations for which the permittee uses the *Compliant Material Option*.

The permittee does not need to redetermine the mass of organic HAP in coatings, thinners and/or other additives, or cleaning materials that have been reclaimed on-site (or reclaimed off-site if the permittee has documentation showing that the permittee received back the exact same materials that were sent off-site) and reused in the coating operation for which the permittee uses the *Emission Rate without Add-on Controls Option*. If the permittee uses coatings, thinners and/or other additives, or cleaning materials that have been reclaimed on-site, the amount of each used in a month may be reduced by the amount of each that is reclaimed. That is, the amount used may be calculated as the amount consumed to account for materials that are reclaimed.

- (a) *Determine the mass fraction of organic HAP for each material.* Determine the mass fraction of organic HAP for each coating, thinner and/or other additive, and cleaning material used during each month according to the requirements in Condition 5.B.5(a).
- (b) *Determine the mass fraction of coating solids.* Determine the mass fraction of coating solids [in kg (lb) of coating solids per kg (lb) of coating] for each coating used during each month according to the requirements in Condition 5.B.5(b).
- (c) *Determine the density of each material.* Determine the density of each liquid coating, thinner and/or other additive, and cleaning material used during each month from test results using ASTM Method D1475-98, “*Standard Test Method for Density of Liquid Coatings, Inks, and Related Products*” (incorporated by reference, see 40 CFR 63.14, Subpart A), information from the manufacturer or supplier of the material, or reference sources providing density or specific gravity data for pure materials. If there is disagreement between ASTM Method D1475-98 and other such information sources, the test results will take precedence unless, after consultation, the permittee demonstrates to the satisfaction of the enforcement agency that the formulation data are correct. If the permittee purchases materials or monitors consumption by weight instead of volume, the permittee does not need to determine material density. Instead, the permittee may use the material weight in place of the combined terms for density and volume in Equations 1A, 1B, 1C, and 2 listed in paragraphs (e) and (f) of this Condition.
- (d) *Determine the volume of each material used.* Determine the volume (in liters) of each coating, thinner and/or other additive, and cleaning material used during each month by measurement or usage records. If the permittee purchases materials or monitors consumption by weight instead of volume, the permittee does not need to determine the volume of each material used. Instead, the permittee may use the

material weight in place of the combined terms for density and volume in Equations 1A, 1B, 1C, and 2 listed in paragraphs (e) and (f) of this condition.

- (e) *Calculate the mass of organic HAP emissions.* The mass of organic HAP emissions is the combined mass of organic HAP contained in all coatings, thinners and/or other additives, and cleaning materials used during each month minus the organic HAP in certain waste materials. Calculate the mass of organic HAP emissions using Equation 1 of this Condition.

$$H_e = A + B + C - R_w \quad (Eq. 1)$$

where:

H_e = total mass of organic HAPs emissions during the month, in kg.

A = total mass of organic HAPs in the coatings used during the month, in kg, as calculated in Equation 1A of this condition.

B = total mass of organic HAPs in the thinners and/or other additives used during the month, in kg, as calculated in Equation 1B of this condition.

C = total mass of organic HAPs in the cleaning materials used during the month, in kg, as calculated in Equation 1C of this condition.

R_w = total mass of organic HAPs in waste materials sent or designated for shipment to a hazardous waste TSDF for treatment or disposal during the month, in kg, determined according to paragraph (e)(4) of this condition (the permittee may assign a value of zero to R_w if the permittee does not wish to use this allowance).

- (1) Calculate the mass of organic HAPs, in kg, in the coatings used during the month using Equation 1A of this condition.

$$A = \sum_{i=1}^m (Vol_{c,i}) (D_{c,i}) (W_{c,i}) \quad (Eq. 1A)$$

where:

A = total mass of organic HAPs in the coatings used during the month, in kg.

$Vol_{c,i}$ = total volume of coating i used during the month, in liters.

$D_{c,i}$ = density of coating i , in kg per liter.

$W_{c,i}$ = mass fraction of organic HAP in coating i , in kg of organic HAPs per kg of coating i . For reactive adhesives (as defined by 40 CFR 63.4581, Subpart PPPP), use the mass fraction of organic HAPs that is emitted as determined using the method in Appendix A to 40 CFR Part 63 – Subpart PPPP.

m = number of different coatings used during the month.

- (2) Calculate the mass of organic HAP, in kg, in the thinners and/or other additives used during the month using Equation 1B of this condition.

$$B = \sum_{j=1}^n (Vol_{t,j}) (D_{t,j}) (W_{t,j}) \quad (Eq. 1B)$$

where:

B = total mass of organic HAPs in the thinners and/or other additives used during the month, in kg.

$Vol_{t,j}$ = total volume of thinner and/or other additive j used during the month, in liters.

$D_{t,j}$ = density of thinner and/or other additive j , in kg per liter.

$W_{t,j}$ = mass fraction of organic HAPs in thinner and/or other additive j , in kg organic HAP per kg thinner and/or other additive j . For reactive adhesives (as defined in 40 CFR 63.4581, Subpart PPPP), use the mass fraction of organic HAPs that is emitted as determined using the method in Appendix A of Subpart PPPP.

n = number of different thinners and/or other additives used during the month.

- (3) Calculate the mass of organic HAPs, in kg, in the cleaning materials used during the month using Equation 1C of this condition.

$$C = \sum_{k=1}^p (Vol_{s,k}) (D_{s,k}) (W_{s,k}) \quad (Eq. 1C)$$

where:

C = total mass of organic HAPs in the cleaning materials used during the month, in kg.

$Vol_{s,k}$ = total volume of cleaning material k used during the month, in liters.

$D_{s,k}$ = density of cleaning material k , in kg per liter.

$W_{s,k}$ = mass fraction of organic HAP in cleaning material k , in kg organic HAP per kg cleaning material k .

p = number of different cleaning materials used during the month.

- (4) If the permittee chooses to account for the mass of organic HAP contained in waste materials sent or designated for shipment to a hazardous waste TSDF in Equation 1 of this condition, then the permittee must determine the mass according to paragraphs (e)(4)(i) through (iv) of this Condition.
 - (i) The permittee may only include waste materials in the determination that are generated by coating operations in the affected source for which the permittee uses Equation 1 of this condition and that will be treated or disposed of by a facility that is regulated as a TSDF under 40 CFR Part 262, 264, 265, or 266. The TSDF may be either on-site or off-site. The permittee may not include organic HAP contained in wastewater.
 - (ii) The permittee must determine either the amount of the waste materials sent to a TSDF during the month or the amount collected and stored during the month and designated for future transport to a TSDF. The permittee shall not include in the determination any waste materials sent to a TSDF during a month if the permittee has already included them in the amount collected and stored during that month or a previous month.
 - (iii) Determine the total mass of organic HAPs contained in the waste materials specified in paragraph (e)(4)(ii) of this Condition.
 - (iv) The permittee must document the methodology the permittee uses to determine the amount of waste materials and the total mass of organic HAP they contain, as required in Condition 5.B.3(g). If waste materials include this information, they may be used as part of the documentation of the amount of waste materials and mass of organic HAPs contained in them.
- (f) *Calculate the total mass of coating solids used.* Determine the total mass of coating solids used, in kg, which is the combined mass of coating solids for all the coatings used during each month, using Equation 2 of this condition.

$$M_{\text{sc}} = \sum_{i=1}^m (Vol_{c,i}) (D_{c,i}) (M_{s,i}) \quad (Eq. 2)$$

where:

M_{st} = total mass of coating solids used during the month, in kg.

$Vol_{c,i}$ = total volume of coating i used during the month, in liters.

$D_{c,i}$ = density of coating i , in kg per liter, determined according to 40 CFR 63.4551(c).

$M_{s,i}$ = mass fraction of coating solids for coating i , in kg coating solids per kg coating i , determined according to 40 CFR 63.4541(b).

m = number of coatings used during the month.

- (g) *Calculate the organic HAP emission rate.* Calculate the organic HAP emission rate for the compliance period, in kg. (lb.) organic HAP emitted per kg (lb) of coating solids used, using Equation 3 of this condition.

$$H_{yr} = \frac{\sum_{y=1}^n H_e}{\sum_{y=1}^n M_{st}} \quad (Eq. 3)$$

where:

H_{yr} = average organic HAP emission rate for the compliance period, in kg organic HAPs emitted per kg of coating solids used.

H_e = total mass of organic HAP emissions from all materials used during month y , in kg, as calculated by Equation 1 of this condition.

M_{st} = total mass of coating solids used during month y , in kg, as calculated by Equation 2 of this condition.

y = identifier of particular month.

n = number of full or partial months in the compliance period (for all compliance periods following the initial compliance period, $n = 12$).

(Ref.: 40 CFR 63.4551, Subpart PPPP)

- 5.B.7 For Emission Points AA-001 through AA-017, AA-025 and AA-026 the permittee shall utilize either of the following options to demonstrate continuous compliance with the

emission limitation of Condition 3.B.3 and shall maintain records as specified in Conditions 5.B.3 or 5.B.4:

(a) *Compliant Material Option.*

- (1) To demonstrate continuous compliance for each compliance period, the permittee must use no coating for which the organic HAP content (as determined using Equation 1 in Condition 5.B.5) exceeds the emission limit in Condition 3.B.3, and use no thinner and/or other additive, or cleaning material that contains organic HAPs [as determined in accordance with Condition 5.B.5(a)]. A compliance period consists of twelve (12) months. Each month, after the end of the initial compliance period, is the end of a compliance period consisting of that month and the preceding eleven (11) months.
- (2) If the permittee chooses to comply with the emission limitation by using the *Compliant Material Option*, then the use of any coating, thinner and/or other additive, or cleaning material that does not meet the criteria specified in paragraph (a) of this condition is a deviation from the emission limitations that must be reported as specified in Condition 5.C.2(c).
- (3) As part of each semi-annual compliance report required by Condition 5.C.2, the permittee must identify the coating operation(s) for which the permittee used the *Compliant Material Option*. If there were no deviations from the emission limit in Condition 3.B.3, then the permittee shall submit a statement that the coating operation(s) was in compliance with the emission limitation during the reporting period because the permittee used no coatings for which the organic HAP content exceeded the emission limit in Condition 3.B.3, and the permittee used no thinner and/or other additive, or cleaning material that contained organic HAP, as determined in accordance with Condition 5.B.5(a).

(b) *Emission Rate without Add-on Controls Option.*

- (1) To demonstrate continuous compliance, the organic HAP emission rate for each compliance period, as determined in accordance with Condition 5.B.6(a) through (g), must be less than or equal to the emission limit in Condition 3.B.3. A compliance period consists of 12 months. Each month, after the end of the initial compliance period, is the end of a compliance period consisting of that month and the preceding 11 months. The permittee must perform the calculations in Condition 5.B.6(a) through (g) on a monthly basis using data from the previous 12 months of operation.
- (2) If the organic HAP emission rate for any 12-month compliance period exceeded the applicable emission limit in Condition 3.B.3, this is a deviation from the emission limitation for that compliance period and must be reported as specified in Condition 5.C.2(d).

- (3) As part of each semi-annual compliance report required by Condition 5.C.2, the permittee must identify the coating operation(s) for which the permittee used the *Emission Rate without Add-on Controls Option*. If there were no deviations from the emission limitation, the permittee must submit a statement that the coating operation(s) was in compliance with the emission limitation during the reporting period because the organic HAP emission rate for each compliance period was less than or equal to the emission limit in Condition 3.B.3, as determined in accordance with Condition 5.B.6(a) through (g).

(Ref.: 40 CFR 63.4542 and 63.4552, Subpart PPPP)

C. SPECIFIC REPORTING REQUIREMENTS

Emission Point(s)	Applicable Requirement	Condition Number	Pollutant/Parameter Monitored	Reporting Requirement
AA-100	11 Miss. Admin. Code Pt. 2, R. 6.3.A(3)(c)(1).	5.C.1	VOCs	Semiannual Compliance Reports
AA-001 through AA-017 AA-025 AA-026	40 CFR 63.4520(a)(1)-(6), Subpart PPPP	5.C.2	Organic HAPs	Semiannual Compliance Reports

- 5.C.1 For Emission Point AA-100 (Facility-Wide), the permittee shall submit a semi-annual monitoring report in accordance with Condition 5.A.4 that summarizes the results of the monitoring and recordkeeping required by Condition 5.B.1.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 6.3.A(3)(c)(1).)

- 5.C.2 For Emission Points AA-001 through AA-017, AA-025 and AA-026, the permittee shall submit a semi-annual compliance reports in accordance with Condition 5.A.4 for determining compliance with 40 CFR Part 63 – Subpart PPPP. Note that the information reported for each of the months in the reporting period will be based on the last twelve (12) months of data prior to the date of each monthly calculation.

- (a) *General requirements.* The semi-annual compliance report must contain the information specified in paragraphs (a)(1) through (5) of this condition, and the information specified in paragraphs (b) through (d) of this condition that is applicable to the permittee's affected source.

- (1) Company name and address.
- (2) Statement by a responsible official with that official's name, title, and signature, certifying the truth, accuracy, and completeness of the content of the report.
- (3) Date of report and beginning and ending dates of the reporting period. The reporting period is the 6-month period ending on June 30 or December 31. Note that the information reported for each of the 6 months in the reporting period will be based on the last 12 months of data prior to the date of each monthly calculation.
- (4) Identification of the compliance option or options specified in Condition 5.B.2 that the permittee used on each coating operation during the reporting period. If the permittee switched between compliance options during the reporting

period, the permittee must report the beginning and ending dates for each option the permittee used.

- (5) If the permittee used the *Emission Rate without Add-on Controls Option* specified in Condition 5.B.2(b), the calculation results for each rolling 12-month organic HAP emission rate during the 6-month reporting period.
- (b) *No deviations.* If there were no deviations from the emission limitations in Condition 3.B.3, the semiannual compliance report must include a statement that there were no deviations from the emission limitations during the reporting period.
- (c) *Deviations: Compliant Material Option.* If the permittee used the *Compliant Material Option* and there was a deviation from the applicable organic HAP content requirements in Condition 3.B.3, the semi-annual compliance report must contain the information in paragraphs (c)(1) through (4) of this section.
 - (1) Identification of each coating used that deviated from the applicable emission limit, and each thinner and/or other additive, and cleaning material used that contained organic HAPs, and the dates and time periods each was used.
 - (2) The calculation of the organic HAP content (using Equation 1 in Condition 5.B.5) for each coating identified in paragraph (c)(1) of this condition. The permittee does not need to submit background data supporting this calculation (e.g. information provided by coating manufacturers or suppliers, or test reports).
 - (3) The determination of mass fraction of organic HAPs for each thinner and/or other additive, and cleaning material identified in paragraph (c)(1) of this section. The permittee does not need to submit background data supporting this calculation (e.g. information provided by material manufacturers or suppliers, or test reports).
 - (4) A statement of the cause of each deviation.
- (d) *Deviations: Emission Rate without Add-on Controls Option.* If the permittee used the *Emission Rate without Add-on Controls Option* and there was a deviation from the emission limit in Condition 3.B.3, the semiannual compliance report must contain the information in paragraphs (d)(1) through (3) of this condition.
 - (1) The beginning and ending dates of each compliance period during which the 12-month organic HAP emission rate exceeded the applicable emission limit in Condition 3.B.3.
 - (2) The calculations used to determine the 12-month organic HAP emission rate for the compliance period in which the deviation occurred. The permittee

must submit the calculations for Equations 1, 1A through 1C, 2, and 3 of Condition 5.B.6; and (if applicable) the calculation used to determine mass of organic HAPs in waste materials according to Condition 5.B.6(e)(4). The permittee does not need to submit background data supporting these calculations (e.g. information provided by materials manufacturers or supplier, or test reports).

- (3) A statement of the cause of each deviation.

(Ref.: 40 CFR 63.4520(a)(1)-(6), Subpart PPPP)

SECTION 6. ALTERNATIVE OPERATING SCENARIOS

6.1 None permitted.

SECTION 7. TITLE VI REQUIREMENTS

The following are applicable or potentially applicable requirements originating from Title VI of the Clean Air Act – Stratospheric Ozone Protection. The full text of the referenced regulations may be found on-line at <http://www.ecfr.gov/> under Title 40, or DEQ shall provide a copy upon request from the permittee.

- 7.1 If the permittee produces, transforms, destroys, imports or exports a controlled substance or imports or exports a controlled product, the permittee shall comply with the applicable requirements of 40 CFR Part 82, Subpart A – Production and Consumption Controls.
- 7.2 If the permittee performs service on a motor vehicle for consideration when this service involves the refrigerant in the motor vehicle air conditioner (MVAC), the permittee shall comply with the applicable requirements of 40 CFR Part 82, Subpart B – Servicing of Motor Vehicle Air Conditioners.
- 7.3 The permittee shall comply with the applicable requirements of 40 CFR Part 82, Subpart E – The Labeling of Products Using Ozone-Depleting Substances, for the following containers and products:
 - (a) All containers in which a class I or class II substance is stored or transported;
 - (b) All products containing a class I substance; and
 - (c) All products directly manufactured with a process that uses a class I substance, unless otherwise exempted by this subpart or, unless EPA determines for a particular product that there are no substitute products or manufacturing processes for such product that do not rely on the use of a class I substance, that reduce overall risk to human health and the environment, and that are currently or potentially available. If the EPA makes such a determination for a particular product, then the requirements of this subpart are effective for such product no later than January 1, 2015.
- 7.4 If the permittee performs any of the following activities, the permittee shall comply with the applicable requirements of 40 CFR Part 82, Subpart F – Recycling and Emissions Reduction:
 - (a) Servicing, maintaining, or repairing appliances;
 - (b) Disposing of appliances, including small appliances and motor vehicle air conditioners; or
 - (c) Refrigerant reclaimers, technician certifying programs, appliance owners and operators, manufacturers of appliances, manufacturers of recycling and recovery equipment, approved recycling and recovery equipment testing organizations, as

well as persons selling, offering for sale, and/or purchasing class I, class II, or non-exempt substitute refrigerants.

- 7.5 The permittee shall be allowed to switch from any ozone-depleting substance to any acceptable alternative that is listed in the Significant New Alternatives Policy (SNAP) program promulgated pursuant to 40 CFR Part 82, Subpart G – Significant New Alternatives Policy Program. The permittee shall also comply with any use conditions for the acceptable alternative substance.
- 7.6 If the permittee performs any of the following activities, the permittee shall comply with the applicable requirements of 40 CFR Part 82, Subpart H – Halon Emissions Reduction:
- (a) Any person testing, servicing, maintaining, repairing, or disposing of equipment that contains halons or using such equipment during technician training;
 - (b) Any person disposing of halons;
 - (c) Manufacturers of halon blends; or
 - (d) Organizations that employ technicians who service halon-containing equipment.
