Permit Application

Program	Sub Program

Marked subprograms should be deleted from the master file by the Master File Administrator

Additional Actions: Scan of Signed Cover Requested
 Requirement Profiles have been loaded.

Basis: Because these activities occur outside of State waters, it is the position of the Department that this activity does not require a Section 401 Water Quality Certification.

Coordination

Comments: The U.S. Army Corps of Engineers submitted a pre-filing meeting request on September 11, 2020. A Water Quality Certification request was made October 13, 2020, with a reasonable period of 60 days. The state of Mississippi’s Wastewater Regulations for Water Quality Certification require a 30-day public notice. No comments were received by the Department regarding the Water Quality Certification for this nationwide permit.
