

**STATE OF MISSISSIPPI
TATE REEVES
GOVERNOR
MISSISSIPPI DEPARTMENT OF ENVIRONMENTAL QUALITY**

August 29, 2024

Mr. Dennis Stieffel
SL Coastal, LLC
13061 Shriners Blvd, Suite C
Biloxi, MS 39532

Dear Mr. Stieffel:

Re: SL Coastal, LLC
Crane Landing Subdivision - 7 Lots
Jackson County
COE No. SAM201900593APS
WQC No. WQC2019062

Pursuant to Section 401 of the Federal Water Pollution Control Act (33 U. S. C. 1251, 1341), the Mississippi Department of Environmental Quality (Department) issues this Certification, after public notice and opportunity for public hearing, to SL Coastal, LLC, an applicant for a Federal License or permit to conduct the following activity:

SL Coastal, LLC, Crane Landing Subdivision – 7 lots: The applicant is requesting a permit modification to place fill material in an additional 1.10 acres of wetlands as well impacts to 0.35-acre manmade stock pond which will be returned to grade, for the construction of an additional seven (7) house lots. The original developer intended to construct 83 60' house lots; however, the current developer found that the county would not approve 60' lots but would approve 72' lots. This resulted in a large financial setback and made the original development unfeasible. The original Section 404 Department of the Army permit, SAM-2019-00593-APS, was issued on March 31, 2021, to place fill in 8.4 acres of wetlands and required the purchase of 16.8 mitigation credits. At the time that the 404 permit was issued, the Section 401 Water Quality Certification was presumed waived. Ownership was then transferred on October 20, 2022. Mitigation for the additional wetland fill would be provided through the purchase of in-kind mitigation credits from an approved mitigation bank. The project is located off Seaman Road, St. Martin, Jackson County, Mississippi [SAM201900593APS, WQC2019062].

The Department certifies that the above-described activity will be in compliance with the applicable provisions of Sections 301, 302, 303, 306, and 307 of the Federal Water Pollution

82394 WQC2019062

Control Act and Section 49-17-29 of the Mississippi Code of 1972, if the applicant complies with the following conditions:

1. The development shall connect to a Department approved wastewater collection and treatment system. All wastewater, including process wastewater, shall be properly treated and disposed in accordance with 11 Mississippi Administrative code Part 6, Chapter 1. (Statement G) (11 Miss. Admin. Code Pt. 6, R. 1.1.1.B)
2. For construction activities, appropriate best management practices (BMPs) shall be properly installed and maintained to prevent the movement of sediment off-site and into adjacent drainage areas. Special care shall be taken prior to and during construction to prevent the movement of sediment offsite and into adjacent avoided wetland areas and adjacent waters. In the event of any BMP failure, corrective actions shall be taken immediately. (Statement F) (11 Miss. Admin. Code Pt. 6, R. 1.1.1.B.)
3. For construction projects five (5) acres or greater of total ground disturbances including clearing, grading, excavating, or other construction activities shall follow the conditions and limitations of the Large Construction General Permit. No construction activities shall begin until the necessary approvals and/or permits have been obtained. Construction activities include a disturbance to the land that results in the change in topography, existing soil cover (both vegetative and non-vegetative), or the existing topography that may result in accelerated stormwater runoff, leading to soil erosion and movement of sediment into surface waters or drainage systems. (Statement F) (11 Miss. Admin. Code Pt. 6, R. 1.1.1.B)
4. The post-construction stormwater management plan submitted on September 29, 2022 by Dennis Stieffel & Associates, P.A., Inc., shall be implemented concurrent with project construction and maintained as proposed. (Statement F) (11 Miss. Admin. Code Pt. 6, R.1.3.4.A (9))
5. Mitigation for the impacts to 1.1 acres of wetlands shall be provided by the purchase of mitigation credits from an approved mitigation bank. The number of credits must be in accordance with the banking prospectus and should be based upon that required for impacting 1.1 acres of wetlands. Written verification of credit purchase must be provided to the Department prior to the commencement of any work in the wetland or stream areas. (Statement E) (11 Miss. Admin. Code Pt. 6, R 1.3.4 A (2)).
6. Turbidity outside the limits of a 750-foot mixing zone shall not exceed the ambient turbidity by more than 50 Nephelometric Turbidity Units. (Statement A) (11 Miss Admin. Code Pt. 6, R. 2.2.A.)
7. No sewage, oil, refuse, or other pollutants shall be discharged into the watercourse. (Statement A) (11 Miss Admin. Code Pt. 6, R. 2.2.A. (3)).

As part of the Scope of Review for Application Decisions, 11 Mississippi Administrative Code Part 6, Rule 1.3.4(B), the above conditions are necessary for the Department to ensure that appropriate measures will be taken to eliminate unreasonable degradation and irreparable harm to waters of the State, such that the activity will not meet the criteria for denial:

- (A) The proposed activity permanently alters the aquatic ecosystem such that water quality criteria are violated and/or it no longer supports its existing or classified uses. An example is the channelization of streams.
- (B) There is a feasible alternative to the activity which reduces adverse consequences on water quality and classified or existing uses of waters of the State.
- (C) The proposed activity adversely impacts waters containing State or federally recognized threatened or endangered species.
- (D) The proposed activity adversely impacts a special or unique aquatic habitat, such as National or State Wild and Scenic Rivers and/or State Outstanding Resource Waters.
- (E) The proposed activity in conjunction with other activities may result in adverse cumulative impacts.
- (F) Nonpoint source/storm water management practices necessary to protect water quality have not been proposed.
- (G) Denial of wastewater permits and/or approvals by the State with regard to the proposed activities.
- (H) The proposed activity results in significant environmental impacts which may adversely impact water quality.

The Department also certifies that there are no limitations under Section 302 nor standards under Sections 306 and 307 of the Federal Water Pollution Control Act which are applicable to the applicant's above-described activity.

This certification is valid for the project as proposed. Any deviations without proper modifications and/or approvals may result in a violation of the 401 Water Quality Certification. If you have any questions, please contact Carrie Barefoot.

Sincerely,

Becky Simonson
Chief, Environmental Permits Division
